Please explain your reasons for wishing to serve and, in your opinion, how you feel you could contribute:

For as long as I could remember, I have spent my time being outdoors, playing with my animals and loving the world we live in but also knowing at the same time that we are not properly taking care of it. Currently, I am enrolled in my school's AP environmental science class and I truly have learned more in one semester of being in class than I have in any other class I have taken. Through learning about biomes, water, and air pollution, geology and even some current politics, I have developed a true passion for the subject and can easily see myself having a career with it someday. By being a part of this board, I believe that it will be a great first step to applying what I have learned to real-life situations and voicing my opinion about what I think needs to change in our environment. I am reliable, honest and fully capable to take on whatever role is needed on the board. Thank you so much for your consideration.
