Use Permit Modification Application  
Gandona Winery  

Use Permit Information Sheet  

1. Use (Narrative description of the proposed use)  

This application seeks to modify existing use permit No. P07-003480-MOD to increase by-appointment tours and tastings to a maximum of 12 visitors per day but no more than 72 per week; to increase the winery’s marketing program to ten 25-person events and three 150-person events annually (with attendees travelling by bus); and to add 2 full-time employees and 1 part-time employee. It also requests the addition of an office and agricultural storage building as described in more detail below. No change in production is requested.  

The increase in by-appointment tours and tastings will allow this very low-producing family-owned winery (which produced under 5,000 gallons of wine per year in the past few years), to take advantage of direct-to-consumer sales, upon which it relies heavily as traditional distribution channels are not available to producers of this size.  

Little or no increase in trips/traffic is anticipated as a result of the increase in by-appointment tours and tastings due to the nature of group visits in hired cars with private drivers. Furthermore, one of the new full-time employees will not be on location regularly, therefore no traffic impact is anticipated with this additional employee. Notably, there is no other winery traffic on the private roadway serving the winery. No tours and tasting will occur during crush. Presently, the winery processes only estate-grown grapes.  

The applicant also requests approval under AB 2004 (“Picnic Ordinance”) for on-site consumption of alcohol.  

Finally, this application includes a road exception request as the unique features of the natural environment and physical site limitations of the access driveway to Gandona Winery result in constraints from meeting the commercial driveway requirements of the updated County Road and Street Standards. Steep terrain, high tree density, existing watercourses and roadway radii present limitations that require the exceptions. As is further explained in the enclosed letter from RSA+ detailing the road exception request, the exceptions will provide the same overall practical effect as the Standards towards providing defensible space, and consideration towards life, safety and public welfare.  

2. Improvements (Narrative description of the proposed on- and off-site improvements)  

The office space in the existing winery needs to be converted to additional lab space as the lab was not properly designed and is too small to accommodate the required equipment and personnel. Accordingly, new office space must be created for the administrative needs of the winery. The proposed site for the new office and agricultural storage building is across the parking lot from the existing winery. The new building will
accommodate two offices, a meeting space, and an employee break room with kitchenette and bathroom, plus an unoccupied agricultural storage area on the lower level. It will have a square footage of 2,022 square feet for the main upstairs office space, and 1,767 square feet for the lower level unoccupied agricultural equipment storage area, totaling 3,789 square feet. The new building will tie into the existing architecture of the winery while blending into the hillside. The two flanking sides will emulate older barn-style buildings. The center portion will take its cue from the winery with a clean contemporary look.
Improvements, cont.

Total on-site parking spaces: _______ existing _______ proposed

Loading areas: _______ existing _______ proposed

Fire Resistivity (check one; if not checked, Fire Marshal will assume Type V – non rated):

☐ Type I FR  ☐ Type II 1 Hr  ☐ Type II N (non-rated)  ☐ Type III 1 Hr  ☐ Type III N

☐ Type IV H.T. (Heavy Timber)  ☐ Type V 1 Hr.  ☐ Type V (non-rated)

(for reference, please see the latest version of the California Building Code)

Is the project located in an Urban/Wildland Interface area?  ☐ Yes  ☑ No

Total land area to be disturbed by project (include structures, roads, septic areas, landscaping, etc): _______ acres

Employment and Hours of Operation

Days of operation: _______ existing _______ proposed

9-12 Sunday

9-6 Mon-Sat

Hours of operation: _______ existing _______ proposed

Anticipated number of employee shifts: _______ existing _______ proposed

2 FT/1 PT

4 FT/2 PT

Anticipated shift hours: _______ existing _______ proposed

8:30-5:00

Max number of on-site employees:

☒ 10 or fewer  ☐ 11-24  ☐ 25 or greater (specify number) ____________

Full-Time:

Existing: 1.Winemaker

2.Sales (50% off site)

Proposed Add'l: 3.Hospitality

4.Sales (75% off site)

Part-Time:

1.Harvest Intern (seasonal)

2.Admin. Assistant
Certification and Indemnification

Applicant certifies that all the information contained in this application, including all information required in the Checklist of Required Application Materials and any supplemental submitted information including, but not limited to, the information sheet, water supply/waste disposal information sheet, site plan, floor plan, building elevations, water supply/waste disposal system site plan and toxic materials list, is complete and accurate to the best of his/her knowledge. Applicant and property owner hereby authorize such investigations including access to County Assessor’s Records as are deemed necessary by the County Planning Division for preparation of reports related to this application, including the right of access to the property involved.

Pursuant to Chapter 1.30 of the Napa County Code, as part of the application for a discretionary land use project approval for the project identified below, Applicant agrees to defend, indemnify, release and hold harmless Napa County, its agents, officers, attorneys, employees, departments, boards and commissions (hereafter collectively "County") from any claim, action or proceeding (hereafter collectively "proceeding") brought against County, the purpose of which is to attack, set aside, void or annul the discretionary project approval of the County, or an action relating to this project required by any such proceeding to be taken to comply with the California Environmental Quality Act by County, or both. This indemnification shall include, but not be limited to damages awarded against the County, if any, and cost of suit, attorneys’ fees, and other liabilities and expenses incurred in connection with such proceeding that relate to this discretionary approval or an action related to this project taken to comply with CEQA whether incurred by the Applicant, the County, and/or the parties initiating or bringing such proceeding. Applicant further agrees to indemnify the County for all of County’s costs, attorneys’ fees, and damages, which the County incurs in enforcing this indemnification agreement.

Applicant further agrees, as a condition of project approval, to defend, indemnify and hold harmless the County for all costs incurred in additional investigation of or study of, or for supplementing, redrafting, revising, or amending any document (such as an EIR, negative declaration, specific plan, or general plan amendment) if made necessary by said proceeding and if the Applicant desires to pursue securing approvals which are conditioned on the approval of such documents.

In the event any such proceeding is brought, County shall promptly notify the Applicant of the proceeding, and County shall cooperate fully in the defense. If County fails to promptly notify the Applicant of the proceeding, or if County fails to cooperate fully in the defense, the Applicant shall not thereafter be responsible to defend, indemnify, or hold harmless the County. The County shall retain the right to participate in the defense of the proceeding if it bears its own attorneys’ fees and costs, and defends the action in good faith. The Applicant shall not be required to pay or perform any settlement unless the settlement is approved by the Applicant.

Manuel Pires, Managing Director of Sage Hill Vineyards, LLC

Supplemental Application for Winery Uses

Operations

Please indicate whether the activity or uses below are already legally EXISTING, whether they exist and are proposed to be EXPANDED as part of this application, whether they are NEWLY PROPOSED as part of this application, or whether they are neither existing nor proposed (NONE).

Retail Wine Sales
EXISTING [X] Expanded [ ] Newly Proposed [ ] None

Tours and Tasting- Open to the Public
EXISTING [ ] Expanded [ ] Newly Proposed [ ] None

Tours and Tasting- By Appointment
EXISTING [ ] Expanded [X] Newly Proposed [ ] None

Food at Tours and Tastings
EXISTING [X] Expanded [ ] Newly Proposed [ ] None

Marketing Events*
EXISTING [X] Expanded [ ] Newly Proposed [ ] None

Food at Marketing Events
EXISTING [X] Expanded [ ] Newly Proposed [ ] None

Will food be prepared...
On-Site? [ ] Catered? [X]

Public display of art or wine-related items
EXISTING [ ] Expanded [ ] Newly Proposed [X] None

* For reference please see definition of “Marketing,” at Napa County Code §18.08.370 - http://library.municode.com/index.aspx?clientId=16513

Production Capacity *

Please identify the winery’s...

Existing production capacity: 20,000 gal/y Per permit №: P07-00348-MOD Permit date: 6/10/2008

Proposed production capacity: No change gal/y

* For this section, please see ”Winery Production Process,” at page 11.

Visitation and Hours of Operation

Please identify the winery’s...

Maximum daily tours and tastings visitation:
6/day (18/wk max) existing

Average daily tours and tastings visitation:
2.5 existing
9-12 Sunday
9-6 Monday-Saturday existing

Visitation hours (e.g. M-Sa, 10am-4pm):
8:30 - 5:00 existing

Non-harvest Production hours:

1 Average daily visitation is requested primarily for purposes of environmental review and will not, as a general rule, provide a basis for any condition of approval limiting allowed winery visitation.

2 It is assumed that wineries will operate up to 24 hours per day during crush.
Grape Origin

All new wineries and any existing (pre-WDO) winery expanding beyond its winery development area must comply with the 75% rule and complete the attached “Initial Statement of Grape Source”. See Napa County Code §18.104.250 (B) & (C).

Marketing Program

Please describe the winery’s proposed marketing program. Include event type, maximum attendance, food service details, etc. Differentiate between existing and proposed activities. (Attach additional sheets as necessary.)

The winery's proposed new marketing program consists of an increase from five 15-person events annually to ten 25-person events, and one 5-person event annually to three 150-person events. Attendees would travel by bus, with approximately 30 persons per bus. For Premiere events, the hours of the event would be approximately 10am to 2pm, and for release events, the hours of the event would be approximately 2pm to 7pm (including clean-up). Portable restrooms will be provided on-site for the larger events.

Food Service

Please describe the nature of any proposed food service including type of food, frequency of service, whether prepared on site or not, kitchen equipment, eating facilities, etc. Please differentiate between existing and proposed food service. (Attach additional sheets as necessary.)

No change to the food service, which is catered by an outside service company.
Definitions

The below are paraphrased from County Code, please see referenced code sections for full text.

a. **Winery Development Area** – All aggregate paved or impervious or semi-permeable ground surface areas of the production facility which includes all storage areas (except caves), offices, laboratories, kitchens, tasting rooms and paved parking areas for the exclusive use of winery employees. *See Napa County Code §18.104.210*

b. **Winery Coverage** – The total square foot area of all winery building footprints, all aggregate paved or impervious ground surface areas of the production facility which includes all outside work, tank and storage areas (except caves); all paved areas including parking and loading areas, walkways, and access driveways to public or private roads or rights-of-way; and all above-ground wastewater and run-off treatment systems. *See Napa County Code §18.104.220*

c. **Production Facility** – (For the purpose to calculate the maximum allowable accessory use) The total square footage of all winery crushing, fermenting, bottling, bulk and bottle storage, shipping, receiving, laboratory, equipment storage and maintenance facilities, and employee-designated restrooms but does not include wastewater treatment or disposal areas which cannot be used for agricultural purposes. *See Napa County Code §18.104.200*

d. **Accessory Use** - The total square footage of area within winery structures used for accessory uses related to a winery that are not defined as “production facility” which would include offices, lobbies/waiting rooms, conference/meeting rooms, non-production access hallways, kitchens, tasting rooms (private and public areas), retail space areas, libraries, non-employee designated restrooms, art display areas, or any area within winery structures not directly related to wine production. *See Napa County Code §18.104.200*
Winery Coverage and Accessory/Production Ratio

**Winery Development Area.** Consistent with the definition at “a,” at page 11 and with the marked-up site plans included in your submittal, please indicate your proposed winery development area. If the facility already exists, please differentiate between existing and proposed.

Existing: 7,359 sq. ft. 0.17 acres

Proposed: 9,491 sq. ft. 0.22 acres

**Winery Coverage.** Consistent with the definition at “b,” at page 11 and with the marked-up site plans included in your submittal, please indicate your proposed winery coverage (maximum 25% of parcel or 15 acres, whichever is less).

21,535 sq. ft. 0.49 acres 0.43 % of parcel

**Production Facility.** Consistent with the definition at “c,” at page 11 and the marked-up floor plans included in your submittal, please indicate your proposed production square footage. If the facility already exists, please differentiate between existing and proposed.

Existing: 7,322 sq. ft.

Proposed: 7,322 sq. ft.

**Accessory Use.** Consistent with the definition at “d,” at page 11 and the marked-up floor plans included in your submittal, please indicate your proposed accessory square footage. If the facility already exists, please differentiate between existing and proposed. (maximum = 40% of the production facility)

Existing: 852 sq. ft. 10.42 % of production facility

Proposed: 2,874 sq. ft. 28.19 % of production facility

Caves and Crushpads

If new or expanded caves are proposed please indicate which of the following best describes the public accessibility of the cave space:

- [ ] None – no visitors/tours/events (Class I)
- [ ] Guided Tours Only (Class II)
- [ ] Public Access (Class III)
- [ ] Marketing Events and/or Temporary Events (Class III)

Please Identify the winery's...

- **Cave area**
  - Existing: 4,508 sq. ft.
  - Proposed: (No change) sq. ft.

- **Covered crush pad area**
  - Existing: 660 sq. ft.
  - Proposed: (No change) sq. ft.

- **Uncovered crush pad area**
  - Existing: 0 sq. ft.
  - Proposed: (No change) sq. ft.
Pursuant to Napa County Zoning Ordinance Sections 12419(b) and (c), I hereby certify that the current application for establishment or expansion of a winery pursuant to the Napa County Winery Definition Ordinance will employ sources of grapes in accordance with the requirements of Section 12419(b) and/or (c) of that Ordinance.

Letters of commitment from grape suppliers and supporting documents may be required prior to issuance of any building permits for the project. Recertification of compliance will be required on a periodic basis. Recertification after initiation of the requested wine production may require the submittal of additional information regarding individual grape sources. Proprietary information will not be disclosed to the public.

*The sum total of domestic and process wastewater is never to exceed 1,000 gpd*

### Solid Waste and Recycling Storage and Disposal

*Please include location and size of solid waste and recycling storage area on site plans in accordance with the guidelines available at www.countyofnapa.org/dem.*

### Hazardous and/or Toxic Materials

*If your facility generates hazardous waste or stores hazardous materials above threshold planning quantities (55 gallons liquid, 500 pounds solid or 200 cubic feet of compressed gas) then a hazardous materials business plan and/or a hazardous waste generator permit will be required.*

### Grading Spoils Disposal

*Temporary stockpile area shown on Civil Sheet UP2. Net fill project with no permanent spoils placement.*
**Winery Traffic Information / Trip Generation Sheet**

**Traffic during a Typical Weekday**

- **Number of FT employees:** \( 2 \) x 3.05 one-way trips per employee = \( 6.1 \) daily trips.
- **Number of PT employees:** \( 0 \) x 1.90 one-way trips per employee = \( 0 \) daily trips.
- **Average number of weekday visitors:** \( 5 \) / 2.6 visitors per vehicle x 2 one-way trips = \( 3.8 \) daily trips.
- **Gallons of production:** \( 5,000/year \) / 1,000 x .009 truck trips daily\(^3\) x 2 one-way trips = \( .09 \) daily trips.

**Total =** \( 9.99 \) daily trips.

Number of total weekday trips x .38 = \( 3.8 \) PM peak trips.

**Traffic during a Typical Saturday**

- **Number of FT employees (on Saturdays):** \( 1 \) x 3.05 one-way trips per employee = \( 3.05 \) daily trips.
- **Number of PT employees (on Saturdays):** \( 0 \) x 1.90 one-way trips per employee = \( 0 \) daily trips.
- **Average number of weekend visitors:** \( 6 \) / 2.8 visitors per vehicle x 2 one-way trips = \( 4.3 \) daily trips.

**Total =** \( 7.35 \) daily trips.

Number of total Saturday trips x .57 = \( 4.2 \) PM peak trips.

**Traffic during a Crush Saturday**

- **Number of FT employees (during crush):** \( 1 \) x 3.05 one-way trips per employee = \( 3.05 \) daily trips.
- **Number of PT employees (during crush):** \( 1 \) x 1.90 one-way trips per employee = \( 1.90 \) daily trips.
- **Average number of weekend visitors:** \( 0 \) / 2.8 visitors per vehicle x 2 one-way trips = \( 0 \) daily trips.
- **Gallons of production:** \( N/A \) / 1,000 x .009 truck trips daily x 2 one-way trips = \( 0 \) daily trips.
- **Avg. annual tons of grape on-haul:** \( 45 \) x .11 truck trips daily\(^4\) x 2 one-way trips = \( 9.9 \) daily trips.

**Total =** \( 14.85 \) daily trips.

Number of total Saturday trips x .57 = \( 8.46 \) PM peak trips.

**Largest Marketing Event- Additional Traffic** (1 event two years ago)

- **Number of event staff (largest event):** by bus \( 2 \) x 2 one-way trips per staff person = \( 2 \) trips.
- **Number of visitors (largest event):** \( 150 \) by bus / 2.8 visitors per vehicle x 2 one-way trips = \( 2 \) trips.
- **Number of special event truck trips (largest event):** \( 1 \) x 2 one-way trips = \( 2 \) trips.

---

\(^3\) Assumes 1.47 materials & supplies trips + 0.8 case goods trips per 1,000 gallons of production / 250 days per year (see Traffic Information Sheet Addendum for reference).

\(^4\) Assumes 4 tons per trip / 36 crush days per year (see Traffic Information Sheet Addendum for reference).
Winery Traffic Information / Trip Generation Sheet

**Traffic during a Typical Weekday**

Number of FT employees: 4 x 3.05 one-way trips per employee = 12.2 daily trips.

Number of PT employees: 2 x 1.90 one-way trips per employee = 3.8 daily trips.

Average number of weekday visitors: 12 / 2.6 visitors per vehicle x 2 one-way trips = 9.2 daily trips.

Gallons of production: 5,000/year / 1,000 x .009 truck trips daily\(^3\) x 2 one-way trips = .09 daily trips.

Total = 25.29 daily trips.

Number of total weekday trips x .38 = 9.61 PM peak trips.

**Traffic during a Typical Saturday**

Number of FT employees (on Saturdays): 2 x 3.05 one-way trips per employee = 6.1 daily trips.

Number of PT employees (on Saturdays): 0 x 1.90 one-way trips per employee = 0 daily trips.

Average number of weekend visitors: 12 / 2.8 visitors per vehicle x 2 one-way trips = 8.57 daily trips.

Total = 14.67 daily trips.

Number of total Saturday trips x .57 = 8.36 PM peak trips.

**Traffic during a Crush Saturday**

Number of FT employees (during crush): 1 x 3.05 one-way trips per employee = 3.05 daily trips.

Number of PT employees (during crush): 1 x 1.90 one-way trips per employee = 1.90 daily trips.

Average number of weekend visitors: 0 / 2.8 visitors per vehicle x 2 one-way trips = 0 daily trips.

Gallons of production: N/A / 1,000 x .009 truck trips daily x 2 one-way trips = 0 daily trips.

Avg. annual tons of grape on-haul: 45 x .11 truck trips daily \(^4\) x 2 one-way trips = 9.9 daily trips.

Total = 14.85 daily trips.

Number of total Saturday trips x .57 = 8.46 PM peak trips.

**Largest Marketing Event- Additional Traffic**

Number of event staff (largest event): 9 x 2 one-way trips per staff person = 18 trips.

Number of visitors (largest event): 150 by bus / 30 visitors per vehicle x 2 one-way trips = 10 trips.

Number of special event truck trips (largest event): 1 x 2 one-way trips = 2 trips.

---

\(^3\) Assumes 1.47 materials & supplies trips + 0.8 case goods trips per 1,000 gallons of production / 250 days per year (see Traffic Information Sheet Addendum for reference).

\(^4\) Assumes 4 tons per trip / 36 crush days per year (see Traffic Information Sheet Addendum for reference).

**There are no visitors during crush. ** Staff will be encouraged to carpool and/or will be bussed for less traffic.
Traffic Information Sheet Addendum

Information for Caltrans Review

Application should include:

**Project Location**
- Site Plan showing all driveway location(s)
- Show detail of Caltrans right-of-way
- Aerial photo at a readable scale

**Trip Generation Estimate**
- Please provide separate Winery Traffic Information / Trip Generation Sheets for existing and proposed operations.

Napa County Winery Traffic Generation Characteristics

**Employees**

- **Half-hour lunch:** All - 2 trips/day (1 during weekday PM peak)
- **Hour lunch:** Permanent Full-Time – 3.2 trips/day (1 during weekday PM peak)
  Permanent Part-Time – 2 trips/day (1 during weekday PM peak)
- **Seasonal:** 2 trips/day (0 during weekday PM peak)—crush
  see full time above—bottling
- **Auto Occupancy:** 1.05 employees/auto

**Visitors**

- **Auto occupancy:**
  - Weekday = 2.6 visitors/auto
  - Weekend = 2.8 visitors/auto

**Peaking Factors:**

- **Peak Month:** 1.65 x average month
- **Average Weekend:** 0.22 x average month
- **Average Saturday:** 0.53 x average weekend
- **Peak Saturday:** 1.65 x average Saturday
- **Average Sunday:** 0.8 x average Saturday
- **Peak Sunday:** 2.0 x average Sunday

- **Peak Weekend Hour:** Winery (3-4 PM) - 0.57 x total for weekend day involved
- **Average 5-Day Week (Monday-Friday):** 1.3 x average weekend
- **Average Weekend:** 0.2 x average 5-day week
- **Peak Weekday Hour:** Winery (3-4 PM) - 0.57 x total for weekday involved
  Roadway PM Peak(4-5 PM?) - 0.38 x total for weekday involved

**Service Vehicles**

- **Grapes (36 days (6weeks)/season):** 1.52 trips/1000 gals/season (4 ton loads assumed)
- **Materials/Supplies (250 days/yr):** 1.47 trips/1000 gals/yr
- **Case Goods (250 days/yr):** 0.8 trips/1000 gal/yr

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the United Program Consolidated Form (UPCF) pages. These data elements are required. If you are not using a computer, you must complete the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) 617-0922 or (800) 617-0942, to obtain one. Please number all pages of your submittal. This helps your CUPA or OA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the site number which identifies your facility.

2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letter "CA". If you do not know the number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) 617-0922 or (800) 617-0942, to obtain one.

3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms "Fully Name" or "Doing Business As Name" that have been used in the past.

103. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. This is the only digit code may also be added.

107. PHONE - Enter a contact phone number.

4. HAZARDOUS MATERIALS - Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- it is in quantities equal to or greater than 500 pounds, 56 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- it is in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- radioactive materials in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 40 CFR, or pursuant to any regulations adopted by the state in accordance with Part 30 of 40 CFR.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

4a. REGULATED SUBSTANCES - Refer to 19 CCR 2777.5 for regulated substances. Check the box to indicate whether your facility has CARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) 25013.1 "USTs". You must complete one UST Facility page and UST Tank pages for each tank. You also must submit a plot plan and a monitoring program.

6. OWN OR OPERATE ABOVEGROUND STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which have the regulated substances. There is no USTC page for ASTs. This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure. (HSC 25013.3) The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility if on or annexed to a hotel, motel, or restaurant and is exempt:
- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if the facility permits and has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors,
- Certain hazardous waste generated by a generator who complies with regulations.

9. HAZARDOUS WASTE DISPOSAL OR STORAGE - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is a person or business whose acts or processes produce a hazardous waste that causes a hazardous waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to transport and dispose of it. Report your EPA ID number in 42. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC 250141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acute hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per 40 CFR 260.32 Check "Yes" to complete the Recyclables/ Reclaimed Materials pages. You, your landlord or residents are allowed to recycle or recover recyclable materials which were generated in the facility. Check "No" if you or any recyclables material are at a remote recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal or destruction of hazardous waste for the purpose of obtaining fuel, or for the purpose of destroying or neutralizing hazardous waste. Refer to HSC 25005.5 for these specific requirements. Treatment includes altering, handling, maintaining, or treating hazardous waste. Refer to HSC 25006.5 for treatment information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance. (Rev 27-08) Prior to the 2015 amendments, financial assurance was based on a formula which took into account generator volume, waste types, and/or generation. The new formula takes into account facility volume, waste types, and/or generation.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. (Rev 31-09) If your facility is a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste for consolidation or at a facility where it is also operated, you must create a account with the Department of Toxic Substances Control (DTSC) and you must obtain a management agreement. If you facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Testing of hazardous materials stored in the tank
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32
- Your facility volume

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

UPCF Rev. (12/2007)

Page 18 of 22
REVISED 06/08/2015
A NEW REQUIREMENT FOR ALL DEVELOPERS AND LANDSCAPE CONTRACTORS FROM THE COUNTY AGRICULTURAL COMMISSIONER

Please notify our office of all impending deliveries of live plants with points of origin outside Napa County.

Napa County needs your help in preventing the introduction of the Glassy-Winged Sharpshooter (GWSS) into our area. The magnitude of the threat that this half-inch long leafhopper insect poses to our local economy, the environment and our quality of life cannot be overstated.

GWSS feeds off a wide variety of plants and possesses the capability of transmitting a bacterium that causes Pierce’s Disease (PD). Grapevines are highly susceptible to a particular strain of this bacterium, which chokes off the water and nutrient flow and eventually kills the plant. GWSS is a stronger flier and a more voracious eater than the common native vectors of PD, and it can quickly spread to all types of habitats in a given location. Ornamental plants and native vegetation may not show any symptoms, but they can serve as reservoirs of PD for many years. GWSS picks up the disease from these infected plants and transmits it to the vineyards while feeding on the grapevines. No other county has as much at risk economically from the threat of PD spread by GWSS.

To combat this threat, Napa County has gone beyond the standard state quarantine regulations in implementing the most rigorous inspection program of any county in the state for incoming plant shipments. We are asking for your cooperation to purchase plant materials locally when possible and notify our office of all impending deliveries of live plants with points of origin outside Napa County. An evaluation based on the origin and contents of each shipment will then be made, and, if necessary, trained personnel will be promptly dispatched to perform an inspection upon its arrival at your destination site. When you purchase ornamental plants from local nurseries, the special restrictions imposed by this county program would not apply.

In conjunction with these plant inspections, the Napa County Agricultural Commissioner’s Office has developed an extensive year-round pest detection program aimed at discovering any possible existing GWSS infestations. Thousands of traps have been set up throughout the county and are routinely monitored by staff members and with the help of vineyards personnel. Sweep surveys are conducted at developments which have been landscaped within the last few years as well as at other high-risk locations. We also participate in meetings, discussions and the distribution of informational materials to educate the public and members of the industry about this matter. Please look over the attached brochures, share them with your employees and contact us if you have any training needs, questions or concerns. Our goal is to have everyone in the community aware and helping us look for GWSS!

Thank you for your continued assistance in providing a greater level of protection to safeguard our community from this serious menace.

Sincerely,

David R. Whitmer
Napa County Agricultural Commissioner
Voluntary Best Management Practices Checklist for Development Projects

Napa County General Plan Policy CON-65 (e) and Policy CON-67 (d) requires the consideration of Greenhouse Gas (GHG) emissions in the review of discretionary projects and to promote and encourage "green building" design. The below Best Management Practices (BMPs) reduce GHG emissions through energy and water conservation, waste reduction, efficient transportation, and land conservation. The voluntary checklist included here should be consulted early in the project and be considered for inclusion in new development. It is not intended, and likely not possible for all projects to adhere to all of the BMPs. Rather, these BMPs provide a portfolio of options from which a project could choose, taking into consideration cost, co-benefits, schedule, and project specific requirements. Please check the box for all BMPs that your project proposes to include and include a separate narrative if your project has special circumstances.

### Practices with Measurable GHG Reduction Potential

The following measures reduce GHG emissions and if needed can be calculated. They are placed in descending order based on the amount of emission reduction potential.

<table>
<thead>
<tr>
<th>Already Doing</th>
<th>Plan To Do</th>
<th>ID #</th>
<th>BMP Name</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>BMP-1</strong> Generation of on-site renewable energy</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>BMP-2</strong> Preservation of developable open space in a conservation easement</td>
</tr>
</tbody>
</table>

- **BMP-1** Generation of on-site renewable energy
  
  If a project team designs with alternative energy in mind at the conceptual stage it can be integrated into the design. For instance, the roof can be oriented, sized, and engineered to accommodate photovoltaic (PV) panels. If you intend to do this BMP, please indicate the location of the proposed PV panels on the building elevations or the location of the ground mounted PV array on the site plan. Please indicate the total annual energy demand and the total annual kilowatt hours produced or purchased and the potential percentage reduction of electrical consumption. Please contact staff or refer to the handout to calculate how much electrical energy your project may need.

- **BMP-2** Preservation of developable open space in a conservation easement
  
  Please indicate the amount and location of developable land (i.e.: under 30% slope and not in creek setbacks or environmentally sensitive areas for vineyards) conserved in a permanent easement to prohibit future development.

In preliminary discussions with the Land Trust regarding possibility of a conservation easement.
BMP-3  Habitat restoration or new vegetation (e.g. planting of additional trees over 1/2 acre)
Napa County is famous for its land stewardship and preservation. Restoring areas within the creek setback reduces erosion potential while planting areas that are currently hardscape (such as doing a bio-retention swale rather than underground storm drains) reduces storm water and helps the groundwater recharge. Planting trees can also increase the annual uptake of CO2e and add the County's carbon stock.

BMP-4  Alternative fuel and electrical vehicles in fleet
The magnitude of GHG reductions achieved through implementation of this measure varies depending on the analysis year, equipment, and fuel type replaced.

- Number of total vehicles
- Typical annual fuel consumption or VMT
- Number of alternative fuel vehicles
- Type of fuel/vehicle(s)
- Potential annual fuel or VMT savings

BMP-5  Exceed Title 24 energy efficiency standards: Build to CALGREEN Tier 2
The California Building Code update effective January 1, 2011 has new mandatory green building measures for all new construction and has been labeled CALGREEN. CALGREEN provides two voluntary higher levels labeled CALGREEN Tier I and CALGREEN Tier II. Each tier adds a further set of green building measures that go above and beyond the mandatory measures of the Code. In both tiers, buildings will use less energy than the current Title 24 California Energy Code. Tier I buildings achieve at least a 15% improvement and Tier 2 buildings are to achieve a 30% improvement. Both tiers require additional non-energy prerequisites, as well as a certain number of elective measures in each green building category (energy efficiency, water efficiency, resource conservation, indoor air quality and community).

BMP-6  Vehicle Miles Traveled (VMT) reduction plan
Selecting this BMP states that the business operations intend to implement a VMT reduction plan reducing annual VMTs by at least 15%.

Tick box(es) for what your Transportation Demand Management Plan will/does include:
- employee incentives
- employee carpool or vanpool
- priority parking for efficient transportation (hybrid vehicles, carpools, etc.)
- bike riding incentives
- bus transportation for large marketing events

Other:

- Estimated annual VMT
- Potential annual VMT saved
- % Change

RECEIVED
AUG 07 2017
Napa County Planning, Building & Environmental Services

As approved by the Planning Commission
07/03/2013
BMP-7  Exceed Title 24 energy efficiency standards: Build to CALGREEN Tier 1
See description below under BMP-5.

BMP-8  Solar hot water heating
Solar water heating systems include storage tanks and solar collectors. There are two types of solar water heating systems: active, which have circulating pumps and controls, and passive, which don’t. Both of them would still require additional heating to bring them to the temperature necessary for domestic purposes. They are commonly used to heat swimming pools.

BMP-9  Energy conserving lighting
Lighting is approximately 25% of typical electrical consumption. This BMP recommends installing or replacing existing light bulbs with energy-efficient compact fluorescent (CF) bulbs or Light Emitting Diode (LED) for your most-used lights. Although they cost more initially, they save money in the long run by using only 1/4 the energy of an ordinary incandescent bulb and lasting 8-12 times longer. Typical payback from the initial purchase is about 18 months.

BMP-10  Energy Star Roof/Living Roof/Cool Roof
Most roofs are dark-colored. In the heat of the full sun, the surface of a black roof can reach temperatures of 158 to 194 °F. Cool roofs, on the other hand, offer both immediate and long-term benefits including reduced building heat-gain and savings of up to 15% the annual air-conditioning energy use of a single-story building. A cool roof and a green roof are different in that the green roof provides living material to act as a both heat sink and thermal mass on the roof which provides both winter warming and summer cooling. A green (living) roof also reduces storm water runoff.

BMP-11  Bicycle Incentives
Napa County Zoning Ordinance requires 1 bicycle rack per 20 parking spaces (§18.110.040). Incentives that go beyond this requirement can include on-site lockers for employees, showers, and for visitor’s items such as directional signs and information on biking in Napa. Be creative!

BMP-12  Bicycle route improvements
Refer to the Napa County Bicycle Plan (NCPTA, December 2011) and note on the site plan the nearest bike routes. Please note proximity, access, and connection to existing and proposed bike lanes (Class I: Completely separated right-of-way; Class II: Striped bike lane; Class III: Signed Bike Routes). Indicate bike accessibility to project and any proposed improvements as part of the project on the site plan or describe below.

As approved by the Planning Commission
07/03/2013
BMP-13 Connection to recycled water

Recycled water has been further treated and disinfected to provide a non-potable (non-drinking water) water supply. Using recycled water for irrigation in place of potable or groundwater helps conserve water resources.

BMP-14 Install Water Efficient fixtures

WaterSense, a partnership program by the U.S. Environmental Protection Agency administers the review of products and services that have earned the WaterSense label. Products have been certified to be at least 20 percent more efficient without sacrificing performance. By checking this box you intend to install water efficient fixtures or fixtures that conserve water by 20%.

BMP-15 Low-impact development (LID)

LID is an approach to land development (or re-development) that works with nature to manage storm water as close to its source as possible. LID employs principles such as preserving and recreating natural landscape features, minimizing effective imperviousness to create functional and appealing site drainage that treat storm water as a resource rather than a waste product. There are many practices that have been used to adhere to these principles such as bioretention facilities, rain gardens, vegetated rooftops, rain barrels, and permeable pavements. By implementing LID principles and practices, water can be managed in a way that reduces the impact of built areas and promotes the natural movement of water within an ecosystem or watershed. Please indicate on the site or landscape plan how your project is designed in this way.

BMP-16 Water efficient landscape

If your project is a residential development proposing in excess of 5,000 sq. ft. or a commercial development proposing in excess of 2,500 sq. ft. The project will be required to comply with the Water Efficient Landscape Ordinance (WELO).

Please check the box if you will be complying with WELO or if your project is smaller than the minimum requirement and you are still proposing drought tolerant, xeriscape, native plantings, zoned irrigation or other water efficient landscape.

BMP-17 Recycle 75% of all waste

Did you know that the County of Napa will provide recycling collectors for the interior of your business at no additional charge? With single stream recycling it is really easy and convenient to meet this goal. To qualify for this BMP, your business will have to be aggressive, proactive and purchase with this goal in mind.
BMP-18 Compost 75% food and garden material

The Napa County food composting program is for any business large or small that generates food scraps and compostable, including restaurants, hotels, wineries, assisted living facilities, grocery stores, schools, manufacturers, cafeterias, coffee shops, etc. All food scraps (including meat & dairy) as well as soiled paper and other compostable - see http://www.naparecycling.com/foodcomposting for more details.

BMP-19 Implement a sustainable purchasing and shipping programs

Environmentally Preferable Purchasing (EPP) or Sustainable Purchasing refers to the procurement of products and services that have a reduced effect on human health and the environment when compared with competing products or services that serve the same purpose. By selecting this BMP, you agree to have an EPP on file for your employees to abide by.

BMP-20 Planting of shade trees within 40 feet of the south side of the building elevation

Well-placed trees can help keep your building cool in summer. If you choose a deciduous tree after the leaves drop in autumn, sunlight will warm your building through south and west-facing windows during the colder months. Well-designed landscaping can reduce cooling costs by 20%. Trees deliver more than energy and cost savings; they are important carbon sinks. Select varieties that require minimal care and water, and can withstand local weather extremes. Fruit or nut trees that produce in your area are great choices, providing you with local food as well as shade. Please use the site or landscape plan to indicate where trees are proposed and which species you are using.

BMP-21 Electrical Vehicle Charging Station(s)

As plug-in hybrid electric vehicles (EV) and battery electric vehicle ownership is expanding, there is a growing need for widely distributed accessible charging stations. Please indicate on the site plan where the station will be.

BMP-22 Public Transit Accessibility

Refer to http://www.ridethevine.com/vine and indicate on the site plan the closest bus stop/route. Please indicate if the site is accessed by transit or by a local shuttle. Provide an explanation of any incentives for visitors and employees to use public transit. Incentives can include bus passes, informational handouts, construction of a bus shelter, transportation from bus stop, etc.
Site Design that is oriented and designed to optimize conditions for natural heating, cooling, and day lighting of interior spaces, and to maximize winter sun exposure; such as a cave. The amount of energy a cave saves is dependent on the type of soil, the microclimate, and the user's request for temperature control. Inherently a cave or a building burned into the ground saves energy because the ground is a consistent temperature and it reduces the amount of heating and cooling required. On the same concept, a building that is oriented to have southern exposure for winter warmth and shading for summer cooling with an east-west cross breeze will naturally heat, cool, and ventilate the structure without using energy. Please check this box if your design includes a cave or exceptional site design that takes into consideration the natural topography and siting. Be prepared to explain your approach and estimated energy savings.

☐ BMP-24 Limit the amount of grading and tree removal
Limiting the amount of earth disturbance reduces the amount of CO2 released from the soil and mechanical equipment. This BMP is for a project design that either proposes a project within an already disturbed area proposing development that follows the natural contours of the land, and that doesn’t require substantial grading or tree removal.

☐ BMP-25 Will this project be designed and built so that it could qualify for LEED?
- BMP-25 (a) ☐ LEED™ Silver (check box BMP-25 and this one)
- BMP-25 (b) ☐ LEED™ Gold (check box BMP-25, BMP-25 (a), and this box)
- BMP-25 (c) ☐ LEED™ Platinum (check all 4 boxes)

Practices with Un-Measured GHG Reduction Potential

☐ BMP-26 Are you, or do you intend to become a Certified Green Business or certified as a "Napa Green Winery"?
As part of the Bay Area Green Business Program, the Napa County Green Business Program is a free, voluntary program that allows businesses to demonstrate the care for the environment by going above and beyond business as usual and implementing environmentally friendly business practices. For more information check out the Napa County Green Business and Winery Program at www.countyofnapa.org.

☐ BMP-27 Are you, or do you intend to become a Certified "Napa Green Land"?
Napa Green Land, fish friendly farming, is a voluntary, comprehensive, "best practices" program for vineyards. Napa Valley vintners and growers develop farm-specific plans tailored to protect and enhance the ecological quality of the region, or create production facility programs that reduce energy and water use, waste and pollution. By selecting this measure either you are certified or you are in the process of certification.
BMP-28 Use of recycled materials
There are a lot of materials in the market that are made from recycled content. By ticking this box, you are committing to use post-consumer products in your construction and your ongoing operations.

BMP-29 Local food production
There are many intrinsic benefits of locally grown food, for instance reducing the transportation emissions, employing full time farm workers, and improving local access to fresh fruits and vegetables.

BMP-30 Education to staff and visitors on sustainable practices
This BMP can be performed in many ways. One way is to simply put up signs reminding employees to do simple things such as keeping the thermostat at a consistent temperature or turning the lights off after you leave a room. If the project proposes alternative energy or sustainable winegrowing, this BMP could include explaining those business practices to staff and visitors.

BMP-31 Use 70-80% cover crop
Cover crops reduce erosion and the amount of tilling which is required, which releases carbon into the environment.

BMP-32 Retain biomass removed via pruning and thinning by chipping the material and reusing it rather than burning on-site
By selecting this BMP, you agree not to burn the material pruned on site.

BMP-33 Are you participating in any of the above BMPS at a 'Parent' or outside location?

BMP-34 Are you doing anything that deserves acknowledgement that isn't listed above?

Comments and Suggestions on this form?

As approved by the Planning Commission
07/03/2013
INDEMNIFICATION AGREEMENT

Pursuant to Chapter 1.30 of the Napa County Code, as part of the application for a discretionary land use project approval for the project identified below, Applicant agrees to defend, indemnify, release and hold harmless Napa County, its agents, officers, attorneys, employees, departments, boards and commissions (hereafter collectively "County") from any claim, action or proceeding (hereafter collectively "proceeding") brought against County, the purpose of which is to attack, set aside, void or annul the discretionary project approval of the County, or an action relating to this project required by any such proceeding to be taken to comply with the California Environmental Quality Act by County, or both. This indemnification shall include, but not be limited to damages awarded against the County, if any, and cost of suit, attorneys' fees, and other liabilities and expenses incurred in connection with such proceeding that relate to this discretionary approval or an action related to this project taken to comply with CEQA whether incurred by the Applicant, the County, and/or the parties initiating or bringing such proceeding. Applicant further agrees to indemnify the County for all of County's costs, attorneys' fees, and damages, which the County incurs in enforcing this indemnification agreement.

Applicant further agrees, as a condition of project approval, to defend, indemnify and hold harmless the County for all costs incurred in additional investigation of or study of, or for supplementing, redrafting, revising, or amending any document (such as an EIR, negative declaration, specific plan, or general plan amendment) if made necessary by said proceeding and if the Applicant desires to pursue securing approvals which are conditioned on the approval of such documents.

In the event any such proceeding is brought, County shall promptly notify the Applicant of the proceeding, and County shall cooperate fully in the defense. If County fails to promptly notify the Applicant of the proceeding, or if County fails to cooperate fully in the defense, the Applicant shall not thereafter be responsible to defend, indemnify, or hold harmless the County. The County shall retain the right to participate in the defense of the proceeding if it bears its own attorneys' fees and costs, and defends the action in good faith. The Applicant shall not be required to pay or perform any settlement unless the settlement is approved by the Applicant.

SUPPLEMENTAL APPLICATION FORM
USE PERMIT EXCEPTION TO CONSERVATION REGULATION

1. Please explain the reason for the exception request.

Construction of a winery office and agricultural storage building across the parking lot from the existing winery, where the average slope is 32.4%.
(See Use Permit and Variance application materials).

2. Are there any alternatives to the project which would not require an exception? Please explain.

No. (See variance application materials).
3. Describe how the project can meet the findings described in Section 18.104.040 A (structural or road project), or Section 18.108.040B (agricultural project).

See below.

Section 18.108.040.A. Structural/road development projects

a. Roads, driveways, buildings and other man-made structures have been designed to complement the natural landform and to avoid excessive grading: (Please describe).

See application materials including site plans by architect Jeffrey Rome showing the building designed to blend into the hillside to minimize grading.

b. Primary and accessory structures employ architectural and design elements which in total serve to reduce the amount of grading and earthmoving activity required for the project, including the following elements:
   i. Multiple-floor levels which follow existing, natural slopes;
   ii. Foundation types such as poles, piles, or stepping level which minimize cut and fill and the need for retaining walls;
   iii. Fence lines, walls, and other features which blend with the existing terrain rather than strike off at an angle against it.

See application materials including site plans by architect Jeffrey Rome showing the building with multiple floor-levels and designed to blend into the hillside to minimize grading.
c. The development project minimizes removal of existing vegetation, incorporates existing vegetation into final design plans, and replacement vegetation of appropriate size, quality and quantity is included to mitigate adverse environmental effects.

See application materials.

4. Adequate fire safety measures have been incorporated into the design of the proposed development.

See application materials.

5. Disturbance to streams and watercourses shall be minimized, and setbacks shall be retained as specified in Section 18.108.025.

N/A

6. The project does not adversely impact threatened or endangered plant or animal habitats as designated by state or federal agencies with jurisdiction and identified on the county's environmental sensitivity maps.

N/A
Section 18.108.040.B. Agricultural projects, or Agricultural roads as defined by Planning, Building, and Environmental Services, Engineering Division

7. The erosion rate that results two years from the completion of the proposed agricultural development does not exceed the soil tolerance factor approved by the Natural Resource Conservation Service for the soil type, topography and climatic conditions in which the project is located;

N/A

8. Impacts on streams and watercourses are minimized, and adequate setbacks along these drainageways are or will be maintained.

N/A

9. The project does not adversely impact sensitive, rare, threatened or endangered plant or animal habitats as designated by state or federal agencies with jurisdiction and identified on the county’s environmental sensitivity maps.

N/A
