Theme 1

Session: How consumers perceive environmental responsibility strategies for winemaking.

- Promoting wine as a product with a natural origin should include proposals for protecting the environment
- Continued use of classical production methods vs. entire winemaking sector's role in safeguarding the environment
- Topics: ecological footprint, functional and genetic biodiversity, as well as climate change.

Theme 2

Panel discussion: Examples of environmental responsibility strategies.

- **Two international cases: from Spain and South Africa, and two Portuguese cases – from the Douro and from the Vinho Verde Regions, will be presented and discussed with those responsible for their implementation.**
