AYES: LUROS, GRAVES, MOTT, TECHEL
NOES: NONE
ABSENT: GREGORY
ABSTAIN: NONE

Matt Lemmon, Senior Civil Engineer, gave a presentation on the Pond Biosolids Removal and Reuse Project, including a background of previous biosolids removal projects and the importance of removing biosolids from NapaSan's ponds. He reported the current project will focus on the northern portion of pond one as this portion has the largest volume of sludge.

Lemmon reviewed the biosolids removal process for the project, which will consist of dredge removal of the sludge. The project will conclude in one season and pond one will remain in service during the project. The contractor will use a drying bed near pond one for the staging area and biosolids dewatering. The biosolids are to be hauled and spread onto the Somky Ranch property. Crops will be planted on the property where the biosolids are spread.

Lemmon noted that the project is part of a series of long-term projects to remove biosolids from pond one. The next project is budgeted for 2023 in the current 10-year CIP. Board and staff held discussion.
