d. Receive presentation from staff and discuss Collection System April 2018 storm response.

Andrew Damron, Technical Services Director, updated the Board on the April 6-7, 2018 storm response. He reported that Napa received three inches of rain in 30 hours during this storm event. NapaSan’s Collection Department crew worked a 24-hour surveillance during the storm. The system did surcharge but no bypassing was needed and no sanitary overflows occurred. He discussed the collection system rehab projects and percentages of the system that have been rehabilitated the past several years and what is expected through 2021.

Damron reviewed the January and February 2017 storm event problems in areas that occurred during the winter. He reviewed the upcoming 2018 and 2019 rehabilitation project areas, and the next steps that staff will follow.

e. Receive presentation from staff and discuss the offset of potable water, groundwater, and surface water use by NapaSan’s recycled water program.

Tim Healy, General Manager, updated the Board on NapaSan’s recycled water facilities. He reported on the sources of funding for recycled water projects, the costs associated with being involved with North Bay Water Reuse Authority (NBWRA) and funds received through their work for recycled water projects. Healy reported that NapaSan’s service area for sanitary sewer is 21.7 square miles with 270 miles of main lines serving 30,000 customers. The services area for recycled water is 31.3 square miles with 26.4 miles of distribution pipelines serving 138 customers at this time, which includes areas in the City of Napa, City of American Canyon potable water service area and Napa County. He reported most of recycled water customers are commercial and landscape users (79%), with 52% being vineyards, and 4% golf courses, 2% cemeteries and 2% parks and playing fields. Conversely, the usage of recycled water is golf courses (59%), Vineyards (19%). Commercial Landscaping (18.5%), Parks/Playfields (3%), Cemeteries (1%). These numbers will change next year with the addition of Tulocay Cemetery, Silverado Middle School, Mount George Elementary School and additional vineyards in the MST and Carneros areas.

Healy reviewed the largest providers of water in Napa Valley, with the City of Napa being the largest provider (potable water), followed by American Canyon, (potable water/recycled water), NapaSan (recycled water), St. Helena (potable water), Calistoga (potable water/recycled water) and Yountville (potable water/recycled water).

NapaSan recycled water offsets the use of 1,417 AF of potable water, 197 AF of groundwater, and 186 AF of surface water, for a total of 1,800 AF. NapaSan recycled water service area is not restricted by LAFCO. The District is largest provider of recycled water in Napa Valley. NapaSan’s recycled water service area

is larger than the sewer system area and most customers are outside of Napa City limits and are converted from another water source.

9. **GENERAL MANAGER REPORT:**

- a. General Manager Healy reported he received an email from CASA Member Alert regarding SB 831, proposed legislation related to waiving all fees associates with Accessory Dwelling Units (ADUs). CASA requests letters from agencies in opposition to SB 831. Healy inquired whether the Board wished to have him compose and send a letter in support or opposition to the Bill. The Board discussed and concurred that they would not like to send a letter.

10. **LEGAL COUNSEL REPORT:** None.

11. **BOARD OF DIRECTORS REPORTS/GENERAL DISCUSSION:**
