

# Bottle Glass Recycling

Upper Valley Recycling offers 2 solutions

## ① Restaurant, Bar & Retail Collection

Upper Valley Recycling has been offering a beverage glass recycling program since the mid 1980's. Beverage glass is kept separated from other recycling. Special containers are used for placement and collection occurs weekly, bi-weekly, or as needed. Please call for service details including current redemption value.

## ② Wine Bottle Collection for Renew

Recently, Upper Valley Recycling began working with Renew, a company in Stockton California who offers a more carbon friendly approach and alternative to recycling through a high density sanitization process. The clean bottles are repackaged and returned back to the wine glass marketplace. Reuse of winery glass from over runs to tasting rooms is another environmentally friendly solution to recovering wine glass.

Upper Valley Recycling can provide your winery with stackable bins for a "call in" collection route.

*The collapsible bin measures  
48" x 45" x 34"  
Collapsed they are estimated 13" high.  
Bins can be stacked either full or collapsed.*

For more information and details please call  
963-7988 or visit our website [UVDS.com](http://UVDS.com)

## Source Separated Glass Recycling (A New Program)

Based on the needs of many of our restaurant customers in commercial areas, Upper Valley Recycling is launching a new program for capturing beverage container glass to better serve your business.

This collection is for source separated glass bottles only. Collection is offered on designated days, to be determined based on your volume. Carts must be made available for automated pick up and we can together discuss the best location for placement. For more information please call us at 963-7988.

I look forward to speaking with you regarding this addition to our service and can also answer any other questions you might have regarding refuse collection and recycling.

Thank you for your continued support and commitment to resource recovery in North Napa Valley.

Kind regards,

Christy Abreu
