Subject: Comments on tomorrow's Napa County Conservation Regulations Agenda Item

Dear Napa County Planning Commissioners,

In light of tomorrow's informational agenda item on Napa County's Conservation Regulations, I wanted to share the following NVG website page with you as a reference:

[Napa County's Conservation Landscape](#)

Napa County has a number of regulations in place that work concurrently with the Conservation Regulations to proactively protect natural resources, the watershed, woodlands, water security, and wildlife habitat. After realizing that there was no single landing page online to find a complete list of all of the County and State regulations that apply to Napa County vineyards, we decided to aggregate the information as a resource for the community.

Please feel free to reach out if you have any questions on the information listed, and thank you in advance for reviewing the material linked above.

Best regards, Molly
