Stop the Clover Flat & UVDS dump/waste sites in Napa Valley

## *We Need Sustainable Solutions for Our Waste for future Generations*

Two local garbage waste sites, Upper Valley Disposal Service (UVDS) on Whitehall Lane and Clover Flat Landfill, are stockpiling local trash and waste at the top of our community's watershed. This is prime agricultural land in our community and our world class wine growing region. It is time to rethink this outdated practice that increases fire risk, threatens our water supply with contamination, and risks degradation of our community and the Napa Valley brand.

### Our Mission

1. To prevent further expansion of the dump sites and degradation to our natural resources and the environment.
2. To hold the elected officials and regulatory agencies accountable.
3. Our ultimate goal is to decommission these two dump/waste sites and relocate them to more a suitable and less environmentally sensitive location with lower fire risk. Better solutions are available to our community.

## Sign the Petition

*The upvalley cities are the only ones storing their trash in paradise. American Canyon decomissioned their landfill and turned it into treasured walking trails. Napa & American Canyon have their waste going out of county to a more suitable location. Tell your elected officials we deserve better.*
