RE: Appointment to the Building Code Board of Appeals for Napa County

To Whom It May Concern:

With the complexity of the number of Building Codes and regulations today it seems to me that a Board of Appeals is good for the Design and Construction Industry in Napa so that conflicted interpretations can be reviewed and enforced in a clear and concise manner. It seems that every building project has some Code issue that are gray in interpretation and with this avenue through the board the issue can be solved before construction starts, especially today with the proliferation of outside plan checkers. As a member of this board I can contribute over 30 years of Design and Construction experience in commercial construction related to Building Codes and Regulations. I have designed single story and up to 12 story office and multi-use commercial buildings in the Bay area and Napa City and County.

**WAYNE HOLLAND
& ASSOCIATES**

FIRM PROFILE

Wayne Holland & Associates is a professional corporation dedicated to providing a full spectrum of planning, architectural and interior design services. These services are based on the combination of creative planning and design, joined with carefully considered technical solutions and strict adherence to construction budgets.

Wayne Holland & Associates has specialized in providing planning, architectural and interior design services to the commercial and residential community for over thirty years. The constraints, which are peculiar to the industry, are generally projects with very fast schedules and minimum budgets. Wayne Holland & Associates will provide design services with these constraints and produce an innovative quality design with no surprises.

ABOUT WAYNE HOLLAND

PRINCIPAL

Wayne Holland is an architect with over 30 years of experience providing master and site planning, architectural and interior design and renovation for commercial and residential clients.

Prior to Wayne Holland & Associates, Mr. Holland was founding partner of HED Architects, Inc., located in the San Francisco Bay Area. HED Architects, Inc. provided many years of planning, architectural and interior services to public, educational, corporate, high technology and residential clients. During Mr. Holland's tenure he received over 15 local and national AIA design awards.

Prior to HED Architects, Inc., Mr. Holland was associate partner with Hawley, Peterson and Snyder Architects, which received a National Honor Award from the AIA for Qume Corporate Headquarters.

Mr. Holland has been a member of the American Institute of Architects Prestigious Documents Committee. This committee develops, reviews and rewrites standard documents for use by the Architectural and Construction industry.

EDUCATION

Bachelor of Fine Arts in Architecture
University of New Mexico

ORGANIZATIONS

Society of Marketing Professional Services

PROJECT DELIVERY

The way to deliver a successful quality project is through project management by:

STAFFING CONTROL

Wayne Holland & Associates will provide a proven project team composed of a project principal [Wayne Holland], and support staff for this management team.

BUDGET CONTROL

Wayne Holland & Associates approach to budget control is to "design to a budget", not "budgeting a design". This is accomplished by careful evaluation of the initial program to verify that the budget is appropriate for the program needs and space allocation. During the design process, it is important to select systems, which meet budget goals, and to periodically review the project budget to avoid major commitments to inappropriate solutions.

QUALITY CONTROL

Wayne Holland & Associates utilizes Auto CADD to minimize the time required to generate construction documents and to take advantage of the computer's abilities to accommodate change in the overall design process.

SCHEDULE CONTROL

Wayne Holland & Associates will develop a schedule so that the project team can respond to project milestones, such as meetings with key people, city processing and approvals, contractor deadlines and early lead-time components for construction and outfitting. Wayne Holland & Associates extensive experience in similar projects within the industry is key in developing and maintaining a realistic schedule anticipating potential problems, thus avoiding surprises. Early identification of schedule problems will allow the project team to resolve these issues in an expeditious manner.
