

FINAL DRAFT

**COLLECTION SYSTEM TECHNICIAN
Salary Grade 213**

DEFINITION

Under direction, , performs technical, paraprofessional, and administrative work in support of District wastewater collection system installation, inspection, and preventive and corrective maintenance activities; assists in the development of preventive maintenance programs; reviews videos from closed-circuit television system to evaluate and score the condition of assets within the collection system; compiles information and generates reports on issues affecting the wastewater collection system operations; and performs other duties as assigned.

SUPERVISION RECEIVED AND EXERCISED

Receives direction from the Collection System Manager. No direct supervision of staff is exercised.

CLASS CHARACTERISTICS

This is a journey-level technical class responsible for performing the technical functions of the day-to-day operations required to ensure that systems and facilities are maintained in a safe and effective working condition; incumbents provide technical and administrative support in the development and maintenance of preventive maintenance programs. Incumbents are expected to work independently and exercise judgment and initiative. Positions at this level receive only occasional instruction or assistance as new or unusual situations arise and are fully aware of the operating procedures and policies of the work unit. This class is distinguished from the Collection System Manager in that the latter is a management class with responsibility for the oversight of all wastewater collection systems and facilities maintenance.

EXAMPLES OF DUTIES (Illustrative Only)

Management reserves the right to add, modify, change, or rescind the work assignments of different positions and to make reasonable accommodations so that qualified employees can perform the essential functions of the job.

- Assists in developing, and updates, the preventive maintenance program to ensure the efficient operation of wastewater collection system equipment and facilities.

- Establish and maintain effective working relationships with those contacted in the course of the work.

Education and Experience:

Any combination of training and experience which would provide the required knowledge, skills, and abilities is qualifying. A typical way to obtain the required qualifications would be:

Education

Equivalent to completion of the twelfth (12th) grade supplemented by specialized coursework in computer science.

Experience:

Five (5) years of progressively responsible skilled experience providing technical support to wastewater utility system and facilities preventive maintenance or asset management programs.

Licenses and Certifications:

- Must possess a valid California Class C Driver's License and maintain a satisfactory driving record.
- possession of a California Water Environment Association Grade III Wastewater Collection System certificate preferred

PHYSICAL DEMANDS

Must possess the ability to work in a standard office setting and use standard office equipment including a computer; to operate a motor vehicle and visit various District sites; vision to read printed materials and a computer screen; and hearing and speech to communicate in person and over the telephone or radio. The job involves fieldwork requiring frequent walking in operational areas to identify problems or hazards. Finger dexterity is needed to access, enter, and retrieve data using a computer keyboard or calculator and to operate above-mentioned tools and equipment. Positions in this classification bend, stoop, kneel, reach, and climb to perform work. Employees must possess the ability to lift, carry, push, and pull materials and objects weighing up to 50 pounds, or heavier weights with the use of proper equipment and assistance from other staff.

ENVIRONMENTAL CONDITIONS

Employees work in an office environment with moderate noise levels, controlled temperature conditions and no direct exposure to hazardous physical substances. When working in a field environment, employees are exposed to loud noise levels, cold and hot temperatures, inclement weather conditions, road hazards, vibration, confining workspaces, chemicals, mechanical and/or electrical hazards, and hazardous physical substances and fumes. Employees may interact with upset staff and/or public and private representatives in interpreting and enforcing departmental policies and procedures.

OTHER REQUIREMENTS

Must be available for standby and response to off-hours emergency situations.
