## 1. EXECUTIVE SUMMARY

---

Kleinfelder performed third party compliance monitoring activities in accordance with the scope of work described in our proposal No. 40-YP6-045 dated April 14, 2006. The purpose of this assessment is to ensure that each of the provisions given within Use Permit #P04-0051-UP is in compliance with the County of Napa requirements. Kleinfelder's findings and conclusions are presented below. These conclusions and a summary of our findings are discussed in greater detail in Chapter 5. This report is subject to the limitations explained in Chapter 6.

This quarterly report was performed and submitted pursuant to a request from Napa County. One additional quarterly report will be prepared in April 2009.

The majority of the conditions of approval have been completed at the Hundred Acre Winery located at 656 Crystal Springs Road. The following are outstanding completion items found during the site visit conducted on January 9, 2009:

- Kleinfelder obtained information on the status of planned restoration planting to be performed along the creek. According to Mr. George Monteverdi of Dickenson, Peatman, and Fogarty (DP&F), attorneys for Mr. Woodbridge, DP&F has been in contact with Greg Martinelli of the California Department of Fish & Game (CDF&G) regarding an application for the permit required to initiate the restoration planting. At his direction, DP&F is preparing a Notification of Lake or Streambed Alteration (i.e. 1602 Permit) application, which will be completed and submitted to CDF&G on or before January 16, 2009. Representatives of The Center for Social and Environmental Stewardship (formerly Circuit Rider Productions, Inc) will be responsible for all aspects of the restoration planting process. Kleinfelder will submit an update to the status of the planned restoration in the April 2009 quarterly report.
- Kleinfelder obtained 702 forms from Clark Bentley for Hundred Acre Winery for the months of February through December 2008. 702 forms from January through March will be included in the April 2009 report.

## 2. INTRODUCTION

---

Mr. Jayson Woodbridge retained Kleinfelder to conduct compliance monitoring of activities within the winery area at 565 Crystal Springs Road in St. Helena, California; referred to herein as the “site.” The purpose of the compliance monitoring is to ensure that the provisions given within Napa County use permit #P04-0051-UP are in compliance with regulatory agencies’ requirements. Kleinfelder performed compliance monitoring in accordance with the scope of work described in our proposal No. 40-YP6-045 and consultation with Napa County Planning Division personnel.

### 2.1 REPORT FORMAT

The following sections describe Kleinfelder’s work scope:

- Section 3, **Site Setting**, is a compilation of information concerning the site’s location and physical setting.
- Section 4, **Site Visit**, describes Kleinfelder’s site observations of the specified in the conditions of approval.
- Section 5, **Findings and Conclusions**, is a presentation of our findings and conclusions regarding the information in Chapters 3 and 4; and presents our opinion on the level of compliance with the provisions within the use permit.
- Section 6, presents our **Limitations**.

### **3. SITE SETTING**

---

This section describes the condition of the site at the time the site visit was conducted on January 9, 2009.

#### **3.1 SITE DESCRIPTION**

The subject site is located at 565 Crystal Springs Road in St. Helena, California. The winery facility portion of the property subject to compliance monitoring is located adjacent the western bank of Conn Creek. The vineyard and main residence road is located to the west of the winery facility. The facility itself consists of a 10,985 square foot cave, a crush pad and hammerhead turnaround, mechanical pad, two parking spaces, and a 120 square foot employee restroom. The access road from Crystal Springs Road has been paved. The surrounding areas consist of varied topography with slopes ranging from 2% near the creek terrace to 75% on the hillsides. The natural drainage is toward Bell Canyon Creek.

## **4. SITE VISIT**

---

Kleinfelder representative, Joe Jolley, conducted a site visit on January 9, 2009, to assess present site conditions associated with the required compliance monitoring. Mr. Jolley was accompanied by George Monteverdi of DP&F during the site visit. Color photographs of the site are shown on Appendix A, Plate 1. Site conditions discussed below are limited to readily apparent environmental conditions observed on the date of the site visit.

### **4.1 ON-SITE OBSERVATIONS**

The winery cave is constructed and in operation. A stairway was completed within the cave. The outdoor crush pad and hammerhead turnaround are completed. The mechanical pad has been poured and an electrical panel and a propane tank are present on the pad. The employee restroom has been completed and faced with decorative stone. Some of the stone facing has been completed on the retaining wall near the cave. PG&E has installed permanent power for the winery facility and pole-mounted transformers were observed. The winery access road has been paved with asphalt.

The bridge access to the winery has been completed, and new this quarter was a sign and lane striping on the bridge. Equipment related to the recent crush activities were observed at the site which included a conveyor belt, storage bins, wine barrels, and wooden pallets. All equipment was clean and neatly stacked.

During the site visit, no employees were observed at the site, and no visitors were observed other than Kleinfelder and DP&F representatives. No traffic was observed.

## **5. FINDINGS AND CONCLUSIONS**

---

Kleinfelder performed the required third party compliance monitoring in accordance with the scope given within our proposal. The purpose of this assessment is to ensure that each of the provisions given within the use permit is in compliance with the County of Napa requirements. In addition to the site visit, Kleinfelder reviewed the applicable information for the outstanding items listed below. Kleinfelder also spoke with the Applicant and its representatives, and County staff to obtain the required information. Kleinfelder's findings and conclusions are presented below.

### **5.1 FINDINGS**

#### **5.1.1 Waste Water System**

Waste water processed at the site is hauled to the Napa County Sewage Treatment Facility for disposal. Kleinfelder spoke to Renee Baumann at Dependable Septic by telephone on January 12, 2009. Due to the short turnaround on this report, the approximate number of gallons of waste water could not be provided for this report. Mr. Baumann confirmed that his company has hauled waste water from the One True Vine facility by truck to Napa County Sewage Treatment on a regular basis. The approximate number of gallons of waste water hauled will be provided in the April 2009 report.

#### **5.1.2 Storm Water Inspection and Drainage Improvements**

Construction at the site has been completed. Kleinfelder did not observe any construction activities at the site that would require compliance with the Stormwater Pollution Prevention Plan (SWPPP).

#### **5.1.3 Winery Operation Compliance**

Kleinfelder monitored winery operations that were apparent during the site visit conducted on January 9, 2009. Kleinfelder observed the following:

- No employees were observed on site.

- Kleinfelder did not observe winery traffic entering or exiting the facility during the site visit.
- Kleinfelder did not observe any unauthorized visitors at the winery facility.
- The winery hours are 7:00am to 5:00pm.
- Weight tags and 702 forms were obtained from Clark Bentley for Hundred Acre Winery. The 702 forms are included in Appendix B and weight tags are included in Appendix C. The 702s submitted are for February through December 2008. See table below for summary. Only 8,009.5 gallons of bulk wine has been bottled during this time period.

#### **5.1.4 Construction Improvements**

The following construction improvements were completed at the site during this quarter monitoring period as per the conditions of approval (COA):

- As required by the COA, the access road was paved and widened.
- As required by the COA, the access bridge on Crystal Springs Road has been completed, a sign has been placed, and bridge lanes have been painted.
- Permanent power has been installed at the site.
- The mechanical pad has been poured. The rock wall has not been constructed at this time. A Permit Modification was requested for phasing of the project to allow installation of the equipment at a later time. This request was included in the letter to the County issued by DP&F dated August 8, 2006. If One True Vine plans to install the equipment and rock wall in the future, a third party noise consultant will be obtained by Kleinfelder to complete the required noise study after the power and equipment are in place.
- The employee restroom has been completed.
- The two parking spaces have been installed.

#### **5.1.5 Grape Source (75% Rule)**

According to Mr. George Monteverdi, grapes were obtained from local vineyards in compliance with the 75% grape source rule.

### **5.1.6 Implementation of the Restoration Plan**

According to Mr. George Monteverdi of DP&F, DP&F has been in contact with Greg Martinelli of the California Department of Fish & Game (CDF&G) regarding application for the permit required to initiate the restoration planting. At his direction, DP&F is preparing a Notification of Lake or Streambed Alteration (i.e. 1602 Permit) application, which will be completed and submitted to CDF&G on or before January 16, 2009. Representatives of The Center for Social and Environmental Stewardship (formerly Circuit Rider Productions, Inc) will be responsible for all aspects of the restoration planting process. Kleinfelder will submit an update to the status of the planned restoration in the April 2009 quarterly report.

### **5.1.7 Noise Analysis**

Following the installation of the equipment and wall, a third party noise consultant shall be obtained to complete the noise study after the equipment is in place. Kleinfelder had previously agreed to obtain a noise consultant on behalf of One True Vine and oversee their activities. Kleinfelder shall be informed when this work is needed.

## **5.2 CONCLUSIONS**

The following are outstanding completion items resulting from this quarterly report period:

- Kleinfelder obtained information on the status of planned restoration planting to be performed along the creek. According to Mr. George Monteverdi of DP&F, DP&F has been in contact with Greg Martinelli of the California Department of Fish & Game (CDF&G) regarding application for the permit required to initiate the restoration planting. At his direction, DP&F is preparing a Notification of Lake or Streambed Alteration (i.e. 1602 Permit) application, which will be completed and submitted to CDF&G on or before January 16, 2009. Representatives of The Center for Social and Environmental Stewardship (formerly Circuit Rider Productions, Inc) will be responsible for all aspects of the restoration planting process. Kleinfelder will submit an update to the status of the planned restoration in the April 2009 quarterly report.

- Kleinfelder obtained 702 forms from Clark Bentley of One True Vine that report gallons of wine on hand for the months of February through December 2008. 702 forms from January through March will be included in the April 2009 report.

## 6. LIMITATIONS

---

Compliance monitoring is non-comprehensive by nature and is unlikely to identify all environmental problems or eliminate all risk. The attached report is a qualitative assessment. Kleinfelder offers a range of investigative and engineering services to suit the needs of our clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help you understand and better manage your risks. Since such detailed services involve greater expense, we ask our clients to participate in identifying the level of service that will provide them with an acceptable level of risk. Please contact the signatories of this report if you would like to discuss this issue of risk further.

The scope of work on this project was presented in our proposal and subsequently approved by Mr. Jayson Woodbridge. Please be aware our scope of work was limited to those items specifically identified in the proposal. Environmental issues, not specifically addressed in the proposal or this report, are beyond the scope of our work and not included in our evaluations.

Kleinfelder performed this environmental site assessment in general accordance with the guidelines set forth in the requirements given to Kleinfelder by the County of Napa and the requirements expressed in the Conditions of Approval for Use Permit #P04-0551-UP. No warranty, either expressed or implied is made.

Land use, site conditions (both on-site and off-site) and other factors will change over time. Since site activities and regulations beyond our control could change at any time after the completion of this report; our observations, findings and opinions can be considered valid only as of the date of the site visit. This report should not be relied upon after 180 days from the date of its issuance.
