Concerning the Walt Ranch Erosion Control Plan  
Application # PH-00205 - EC PA Project  
Draft Environmental Impact Report

In order to evaluate and comment on the Walt (Hall) project in a responsible and respectful manner, Claire M. Camp and family need an extension on this proposal. (45 days)

The three large packets of the draft contain information that concern our already scarcity of water, <sup>existing and</sup> pending wild life, pristine vegetation, air quality, and future existence and well being.

Surviving in this already fragile area needs utmost attention for surrounding residents - many of whom are unaware of the vast undertaken and future consequences it will entail.

Therefore, we're addressing the above to Kelli Cahill, Planner II, Planning Building and Environmental Dept.

In addition, I've spoken briefly to Mike Karath who represents the Board of Supervisors. Mr. Karath said he would relay our concerns to them too.

Ample time and extension is requested as stated above.

Thank you,

Claire Camp & Family
