A Tradition of Stewardship A Commitment to Service

Use Permit Application

To be completed by Planning staff...

Application Type: Use Permit

Date Submitted: 6/20/14 Resubmittal(s): 1/20/16, 4/22/16 Date Complete:

Request: 50-room hotel with retail, full-service spa and restaurant

*Application Fee Deposit: \$ Receipt No. Received by: Date:

*Total Fees will be based on actual time and materials

To be completed by applicant...

Project Name: Dak Knoll Hotel

Assessor's Parcel No: 035-031-009 Existing Parcel Size: ac.

Site Address/Location: 5091 Solano Avenue Napa CA 94558

Primary Contact: [] Owner [x] Applicant [] Representative (attorney, engineer, consulting planner, etc.)

Property Owner: Dak Knoll Resort, LLC

Mailing Address:

Telephone No() E-Mail:

Applicant (if other than property owner): Brian Russell

Mailing Address: 1485 Main St. # 205 St. Helena, CA 94574

Telephone No(707) 294-2775 E-Mail: napalandlaw@gmail.com

Representative (if applicable): Brian Russell

Mailing Address:

Telephone No() E-Mail:

Improvements, cont.

Total on-site parking spaces: 111 existing 109 proposed
Loading areas: _____ existing _____ proposed

Fire Resistivity (check one; if not checked, Fire Marshal will assume Type V – non rated):

- Type I FR Type II 1 Hr Type II N (non-rated) Type III 1 Hr Type III N
 Type IV H.T. (Heavy Timber) Type V 1 Hr. Type V (non-rated)
(for reference, please see the latest version of the California Building Code)

Is the project located in an Urban/Wildland Interface area? Yes No

Total land area to be disturbed by project (include structures, roads, septic areas, landscaping, etc): _____ acres

Employment and Hours of Operation

Days of operation: _____ existing _____ proposed
Hours of operation: _____ existing _____ proposed
Anticipated number of employee shifts: _____ existing _____ proposed
Anticipated shift hours: _____ existing _____ proposed

Maximum Number of on-site employees:

- 10 or fewer 11-24 25 or greater (specify number) 33

Certification and Indemnification

Applicant certifies that all the information contained in this application, including all information required in the Checklist of Required Application Materials and any supplemental submitted information including, but not limited to, the information sheet, water supply/waste disposal information sheet, site plan, floor plan, building elevations, water supply/waste disposal system site plan and toxic materials list, is complete and accurate to the best of his/her knowledge. Applicant and property owner hereby authorize such investigations including access to County Assessor's Records as are deemed necessary by the County Planning Division for preparation of reports related to this application, *including the right of access to the property involved.*

Pursuant to Chapter 1.30 of the Napa County Code, as part of the application for a discretionary land use project approval for the project identified below, Applicant agrees to defend, indemnify, release and hold harmless Napa County, its agents, officers, attorneys, employees, departments, boards and commissions (hereafter collectively "County") from any claim, action or proceeding (hereafter collectively "proceeding") brought against County, the purpose of which is to attack, set aside, void or annul the discretionary project approval of the County, or an action relating to this project required by any such proceeding to be taken to comply with the California Environmental Quality Act by County, or both. This indemnification shall include, but not be limited to damages awarded against the County, if any, and cost of suit, attorneys' fees, and other liabilities and expenses incurred in connection with such proceeding that relate to this discretionary approval or an action related to this project taken to comply with CEQA whether incurred by the Applicant, the County, and/or the parties initiating or bringing such proceeding. Applicant further agrees to indemnify the County for all of County's costs, attorneys' fees, and damages, which the County incurs in enforcing this indemnification agreement.

Applicant further agrees, as a condition of project approval, to defend, indemnify and hold harmless the County for all costs incurred in additional investigation of or study of, or for supplementing, redrafting, revising, or amending any document (such as an EIR, negative declaration, specific plan, or general plan amendment) if made necessary by said proceeding and if the Applicant desires to pursue securing approvals which are conditioned on the approval of such documents.

In the event any such proceeding is brought, County shall promptly notify the Applicant of the proceeding, and County shall cooperate fully in the defense. If County fails to promptly notify the Applicant of the proceeding, or if County fails to cooperate fully in the defense, the Applicant shall not thereafter be responsible to defend, indemnify, or hold harmless the County. The County shall retain the right to participate in the defense of the proceeding if it bears its own attorneys' fees and costs, and defends the action in good faith. The Applicant shall not be required to pay or perform any settlement unless the settlement is approved by the Applicant.

Certification and Indemnification

Applicant certifies that all the information contained in this application, including all information required in the Checklist of Required Application Materials and any supplemental submitted information including, but not limited to, the information sheet, water supply/waste disposal information sheet, site plan, floor plan, building elevations, water supply/waste disposal system site plan and toxic materials list, is complete and accurate to the best of his/her knowledge. Applicant and property owner hereby authorize such investigations including access to County Assessor's Records as are deemed necessary by the County Planning Division for preparation of reports related to this application, *including the right of access to the property involved.*

Pursuant to Chapter 1.30 of the Napa County Code, as part of the application for a discretionary land use project approval for the project identified below, Applicant agrees to defend, indemnify, release and hold harmless Napa County, its agents, officers, attorneys, employees, departments, boards and commissions (hereafter collectively "County") from any claim, action or proceeding (hereafter collectively "proceeding") brought against County, the purpose of which is to attack, set aside, void or annul the discretionary project approval of the County, or an action relating to this project required by any such proceeding to be taken to comply with the California Environmental Quality Act by County, or both. This indemnification shall include, but not be limited to damages awarded against the County, if any, and cost of suit, attorneys' fees, and other liabilities and expenses incurred in connection with such proceeding that relate to this discretionary approval or an action related to this project taken to comply with CEQA whether incurred by the Applicant, the County, and/or the parties initiating or bringing such proceeding. Applicant further agrees to indemnify the County for all of County's costs, attorneys' fees, and damages, which the County incurs in enforcing this indemnification agreement.

Applicant further agrees, as a condition of project approval, to defend, indemnify and hold harmless the County for all costs incurred in additional investigation of or study of, or for supplementing, redrafting, revising, or amending any document (such as an EIR, negative declaration, specific plan, or general plan amendment) if made necessary by said proceeding and if the Applicant desires to pursue securing approvals which are conditioned on the approval of such documents.

In the event any such proceeding is brought, County shall promptly notify the Applicant of the proceeding, and County shall cooperate fully in the defense. If County fails to promptly notify the Applicant of the proceeding, or if County fails to cooperate fully in the defense, the Applicant shall not thereafter be responsible to defend, indemnify, or hold harmless the County. The County shall retain the right to participate in the defense of the proceeding if it bears its own attorneys' fees and costs, and defends the action in good faith. The Applicant shall not be required to pay or perform any settlement unless the settlement is approved by the Applicant.

Supplemental Application for Winery Uses

Operations

Please indicate whether the activity or uses below are already legally **EXISTING**, whether they exist and are proposed to be **EXPANDED** as part of this application, whether they are **NEWLY PROPOSED** as part of this application, or whether they are neither existing nor proposed (**NONE**).

Retail Wine Sales	<input type="checkbox"/> Existing	<input type="checkbox"/> Expanded	<input type="checkbox"/> Newly Proposed	<input checked="" type="checkbox"/> None
Tours and Tasting- Open to the Public	<input type="checkbox"/> Existing			
Tours and Tasting- By Appointment	<input type="checkbox"/> Existing	<input type="checkbox"/> Expanded	<input type="checkbox"/> Newly Proposed	<input checked="" type="checkbox"/> None
Food at Tours and Tastings	<input type="checkbox"/> Existing	<input type="checkbox"/> Expanded	<input type="checkbox"/> Newly Proposed	<input checked="" type="checkbox"/> None
Marketing Events*	<input type="checkbox"/> Existing	<input type="checkbox"/> Expanded	<input type="checkbox"/> Newly Proposed	<input checked="" type="checkbox"/> None
Food at Marketing Events	<input type="checkbox"/> Existing	<input type="checkbox"/> Expanded	<input type="checkbox"/> Newly Proposed	<input checked="" type="checkbox"/> None
Will food be prepared...		<input checked="" type="checkbox"/> On-Site?	<input type="checkbox"/> Catered?	
Public display of art or wine-related items	<input type="checkbox"/> Existing	<input type="checkbox"/> Expanded	<input type="checkbox"/> Newly Proposed	<input checked="" type="checkbox"/> None

* For reference please see definition of "Marketing," at Napa County Code §18.08.370 - <http://library.municode.com/index.aspx?clientId=16513>

Production Capacity *

Please identify the winery's...

Existing production capacity: _____ gal/y Per permit No: _____ Permit date: _____

Current maximum actual production: _____ gal/y For what year? _____

Proposed production capacity: _____ gal/y

* For this section, please see "Winery Production Process," at page 11.

Visitation and Hours of Operation

Please identify the winery's...

Maximum daily tours and tastings visitation: _____ existing _____ proposed

Average daily tours and tastings visitation¹: _____ existing _____ proposed

Visitation hours (e.g. M-Sa, 10am-4pm): _____ existing _____ proposed

Non-harvest Production hours²: _____ existing _____ proposed

¹ Average daily visitation is requested primarily for purposes of environmental review and will not, as a general rule, provide a basis for any condition of approval limiting allowed winery visitation.

² It is assumed that wineries will operate up to 24 hours per day during crush.

Water Supply/ Waste Disposal Information Sheet

Water Supply

Please attach completed Phase I Analysis sheet.

	Domestic	Emergency
Proposed source of water (e.g., spring, well, mutual water company, city, district, etc.):	<u>City of Napa</u>	_____
Name of proposed water supplier (if water company, city, district):	<u>City of Napa</u>	_____
Is annexation needed?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
Current water use:	<u>8,200</u> gallons per day (gal/d)	
Current water source:	<u>City of Napa</u>	<u>N/A</u>
Anticipated future water demand: * Peak flow	<u>8,280*</u> gal/d	<u>N/A</u> gal/d
Water availability (in gallons/minute):	<u>65</u> gal/m	<u>N/A</u> gal/m
Capacity of water storage system:	<u>48,000</u> gal	<u>80,000</u> gal
Type of emergency water storage facility if applicable (e.g., tank, reservoir, swimming pool, etc.):	<u>Underground Storage Tank, Swimming Pool</u>	

Liquid Waste

Please attach Septic Feasibility Report

	Domestic	Other
Type of waste:	<u>sewage</u>	_____
Disposal method (e.g., on-site septic system, on-site ponds, community system, district, etc.):	<u>Advanced onsite treatment system</u>	_____
Name of disposal agency (if sewage district, city, community system):	<u>Oak Knoll Hotel</u>	_____
Is annexation needed?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
Current waste flows (peak flow):	<u>7,120</u> gal/d	_____ gal/d
Anticipated future waste flows (peak flow):	<u>8,050</u> gal/d	_____ gal/d
Future waste disposal design capacity: * Wastewater disposal system has 200% capacity of daily flow	<u>8,050*</u> gal/d	_____ gal/d

Solid Waste and Recycling Storage and Disposal

Please include location and size of solid waste and recycling storage area on site plans in accordance with the guidelines available at www.countyofnapa.org/dem.

Hazardous and/or Toxic Materials

If your facility generates hazardous waste or stores hazardous materials above threshold planning quantities (55 gallons liquid, 500 pounds solid or 200 cubic feet of compressed gas) then a hazardous materials business plan and/or a hazardous waste generator permit will be required.

Grading Spoils Disposal

Where will grading spoils be disposed of?
(e.g. on-site, landfill, etc. If off-site, please indicate where off-site): On Site

F. LOCAL REQUIREMENTS

(You may also be required to provide additional information by your CUPA or local agency.)

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters CA. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms Facility Name or DBA - Doing Business As that might have been used in the past.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. CONTACT- Enter a contact person's name.
107. PHONE- Enter a contact phone number

4. HAZARDOUS MATERIALS -

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer YES to this question if you exceed only a local threshold, but do not exceed the state threshold.

- 4a. REGULATED SUBSTANCES - Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.
5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) 25316. If YES, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC 25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):
An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC 25270.2 (k)) is not subject to this act and is exempt:
 - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
 - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
 - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
 - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC 25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC 25143.2. Check YES and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check NO if you only send recyclable materials to an offsite recycler. You do not need to report.
11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of treatment for certain processes under specific, limited conditions. Refer to HSC 25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC 25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.
12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR 67450.13 (b) and HSC 25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer YES if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:
 - Your knowledge of the tank and its contents
 - Testing of the tank
 - Inability to remove hazardous materials stored in the tank.
 - The mixture rule
 - The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

Voluntary Best Management Practices Checklist for Development Projects

Napa County General Plan Policy CON-65 (e) and Policy CON-67 (d) requires the consideration of Greenhouse Gas (GHG) emissions in the review of discretionary projects and to promote and encourage "green building" design. The below Best Management Practices (BMPs) reduce GHG emissions through energy and water conservation, waste reduction, efficient transportation, and land conservation. The voluntary checklist included here should be consulted early in the project and be considered for inclusion in new development. It is not intended, and likely not possible for all projects to adhere to all of the BMPs. Rather, these BMPs provide a portfolio of options from which a project could choose, taking into consideration cost, co-benefits, schedule, and project specific requirements. Please check the box for all BMPs that your project proposes to include and include a separate narrative if your project has special circumstances.

Practices with Measurable GHG Reduction Potential

The following measures reduce GHG emissions and if needed can be calculated. They are placed in descending order based on the amount of emission reduction potential.

Already Doing	Plan To Do	ID #	BMP Name
<input type="checkbox"/>	<input type="checkbox"/>	BMP-1	Generation of on-site renewable energy <i>If a project team designs with alternative energy in mind at the conceptual stage it can be integrated into the design. For instance, the roof can be oriented, sized, and engineered to accommodate photovoltaic (PV) panels. If you intend to do this BMP, please indicate the location of the proposed PV panels on the building elevations or the location of the ground mounted PV array on the site plan. Please indicate the total annual energy demand and the total annual kilowatt hours produced or purchased and the potential percentage reduction of electrical consumption. Please contact staff or refer to the handout to calculate how much electrical energy your project may need.</i>

<input type="checkbox"/>	<input type="checkbox"/>	BMP-2	Preservation of developable open space in a conservation easement <i>Please indicate the amount and location of developable land (i.e.: under 30% slope and not in creek setbacks or environmentally sensitive areas for vineyards) conserved in a permanent easement to prohibit future development.</i>

Already Plan
Doing To Do

BMP-3 Habitat restoration or new vegetation (e.g. planting of additional trees over 1/2 acre)

Napa County is famous for its land stewardship and preservation. Restoring areas within the creek setback reduces erosion potential while planting areas that are currently hardscape (such as doing a bio-retention swale rather than underground storm drains) reduces storm water and helps the groundwater recharge. Planting trees can also increase the annual uptake of CO₂e and add the County's carbon stock.

There is existing vegetation that will be restored if healthy and fits within the project program. Otherwise, the new trees and landscaping will be planted on site.

BMP-4 Alternative fuel and electrical vehicles in fleet

The magnitude of GHG reductions achieved through implementation of this measure varies depending on the analysis year, equipment, and fuel type replaced.

Number of total vehicles _____

Typical annual fuel consumption or VMT _____

Number of alternative fuel vehicles _____

Type of fuel/vehicle(s) _____

Potential annual fuel or VMT savings _____

BMP-5 Exceed Title 24 energy efficiency standards: Build to CALGREEN Tier 2

The California Building Code update effective January 1, 2011 has new mandatory green building measures for all new construction and has been labeled CALGREEN. CALGREEN provides two voluntary higher levels labeled CALGREEN Tier I and CALGREEN Tier II. Each tier adds a further set of green building measures that go above and beyond the mandatory measures of the Code. In both tiers, buildings will use less energy than the current Title 24 California Energy Code. Tier I buildings achieve at least a 15% improvement and Tier 2 buildings are to achieve a 30% improvement. Both tiers require additional non-energy prerequisites, as well as a certain number of elective measures in each green building category (energy efficiency, water efficiency, resource conservation, indoor air quality and community).

BMP-6 Vehicle Miles Traveled (VMT) reduction plan

Selecting this BMP states that the business operations intend to implement a VMT reduction plan reducing annual VMTs by at least 15%.

Tick box(es) for what your Transportation Demand Management Plan will/does include:

- employee incentives
- employee carpool or vanpool
- priority parking for efficient transportation (hybrid vehicles, carpools, etc.)
- bike riding incentives
- bus transportation for large marketing events
- Other: _____

Estimated annual VMT _____

Potential annual VMT saved _____

% Change _____

Already Plan
Doing To Do

- BMP-7 Exceed Title 24 energy efficiency standards: Build to CALGREEN Tier 1**

See description below under BMP-5.

- BMP-8 Solar hot water heating**

Solar water heating systems include storage tanks and solar collectors. There are two types of solar water heating systems: active, which have circulating pumps and controls, and passive, which don't. Both of them would still require additional heating to bring them to the temperature necessary for domestic purposes. They are commonly used to heat swimming pools.

- BMP-9 Energy conserving lighting**

Lighting is approximately 25% of typical electrical consumption. This BMP recommends installing or replacing existing light bulbs with energy-efficient compact fluorescent (CF) bulbs or Light Emitting Diode (LED) for your most-used lights. Although they cost more initially, they save money in the long run by using only 1/4 the energy of an ordinary incandescent bulb and lasting 8-12 times longer. Typical payback from the initial purchase is about 18 months.

- BMP-10 Energy Star Roof/Living Roof/Cool Roof**

Most roofs are dark-colored. In the heat of the full sun, the surface of a black roof can reach temperatures of 158 to 194 °F. Cool roofs, on the other hand, offer both immediate and long-term benefits including reduced building heat-gain and savings of up to 15% the annual air-conditioning energy use of a single-story building. A cool roof and a green roof are different in that the green roof provides living material to act as a both heat sink and thermal mass on the roof which provides both winter warming and summer cooling. A green (living) roof also reduces storm water runoff.

- BMP-11 Bicycle Incentives**

Napa County Zoning Ordinance requires 1 bicycle rack per 20 parking spaces (§18.110.040). Incentives that go beyond this requirement can include on-site lockers for employees, showers, and for visitor's items such as directional signs and information on biking in Napa. Be creative!

The project will be bicycle friendly.

- BMP-12 Bicycle route improvements**

Refer to the Napa County Bicycle Plan (NCPTA, December 2011) and note on the site plan the nearest bike routes. Please note proximity, access, and connection to existing and proposed bike lanes (Class I: Completely separated right-of-way; Class II: Striped bike lane; Class III: Signed Bike Routes). Indicate bike accessibility to project and any proposed improvements as part of the project on the site plan or describe below.

Already Doing Plan To Do

BMP-13 Connection to recycled water

Recycled water has been further treated and disinfected to provide a non-potable (non-drinking water) water supply. Using recycled water for irrigation in place of potable or groundwater helps conserve water resources.

BMP-14 Install Water Efficient fixtures

WaterSense, a partnership program by the U.S. Environmental Protection Agency administers the review of products and services that have earned the WaterSense label. Products have been certified to be at least 20 percent more efficient without sacrificing performance. By checking this box you intend to install water efficient fixtures or fixtures that conserve water by 20%.

BMP-15 Low-impact development (LID)

LID is an approach to land development (or re-development) that works with nature to manage storm water as close to its source as possible. LID employs principles such as preserving and recreating natural landscape features, minimizing effective imperviousness to create functional and appealing site drainage that treat storm water as a resource rather than a waste product. There are many practices that have been used to adhere to these principles such as bioretention facilities, rain gardens, vegetated rooftops, rain barrels, and permeable pavements. By implementing LID principles and practices, water can be managed in a way that reduces the impact of built areas and promotes the natural movement of water within an ecosystem or watershed. Please indicate on the site or landscape plan how your project is designed in this way.

BMP-16 Water efficient landscape

If your project is a residential development proposing in excess of 5,000 sq. ft. or a commercial development proposing in excess of 2,500 sq. ft. The project will be required to comply with the Water Efficient Landscape Ordinance (WELO).

Please check the box if you will be complying with WELO or if your project is smaller than the minimum requirement and you are still proposing drought tolerant, zeroscape, native plantings, zoned irrigation or other water efficient landscape.

BMP-17 Recycle 75% of all waste

Did you know that the County of Napa will provide recycling collectors for the interior of your business at no additional charge? With single stream recycling it is really easy and convenient to meet this goal. To qualify for this BMP, your business will have to be aggressive, proactive and purchase with this goal in mind.

Already Doing Plan To Do

BMP-18 Compost 75% food and garden material

The Napa County food composting program is for any business large or small that generates food scraps and compostable, including restaurants, hotels, wineries, assisted living facilities, grocery stores, schools, manufacturers, cafeterias, coffee shops, etc. All food scraps (including meat & dairy) as well as soiled paper and other compostable - see <http://www.naparecycling.com/foodcomposting> for more details.

BMP-19 Implement a sustainable purchasing and shipping programs

Environmentally Preferable Purchasing (EPP) or Sustainable Purchasing refers to the procurement of products and services that have a reduced effect on human health and the environment when compared with competing products or services that serve the same purpose. By selecting this BMP, you agree to have an EPP on file for your employees to abide by.

BMP-20 Planting of shade trees within 40 feet of the south side of the building elevation

Well-placed trees can help keep your building cool in summer. If you choose a deciduous tree after the leaves drop in autumn, sunlight will warm your building through south and west-facing windows during the colder months. Well-designed landscaping can reduce cooling costs by 20%. Trees deliver more than energy and cost savings; they are important carbon sinks. Select varieties that require minimal care and water, and can withstand local weather extremes. Fruit or nut trees that produce in your area are great choices, providing you with local food as well as shade. Please use the site or landscape plan to indicate where trees are proposed and which species you are using.

BMP-21 Electrical Vehicle Charging Station(s)

As plug-in hybrid electric vehicles (EV) and battery electric vehicle ownership is expanding, there is a growing need for widely distributed accessible charging stations. Please indicate on the site plan where the station will be.

BMP-22 Public Transit Accessibility

Refer to <http://www.ridethevine.com/vine> and indicate on the site plan the closest bus stop/route. Please indicate if the site is accessed by transit or by a local shuttle. Provide an explanation of any incentives for visitors and employees to use public transit. Incentives can include bus passes, informational hand outs, construction of a bus shelter, transportation from bus stop, etc.

Already Plan
Doing To Do

BMP-23

Site Design that is oriented and designed to optimize conditions for natural heating, cooling, and day lighting of interior spaces, and to maximize winter sun exposure; such as a cave.

The amount of energy a cave saves is dependent on the type of soil, the microclimate, and the user's request for temperature control. Inherently a cave or a building buried into the ground saves energy because the ground is a consistent temperature and it reduces the amount of heating and cooling required. On the same concept, a building that is oriented to have southern exposure for winter warmth and shading for summer cooling with an east-west cross breeze will naturally heat, cool, and ventilate the structure without using energy. Please check this box if your design includes a cave or exceptional site design that takes into consideration the natural topography and sitting. Be prepared to explain your approach and estimated energy savings.

BMP-24 Limit the amount of grading and tree removal

Limiting the amount of earth disturbance reduces the amount of CO2 released from the soil and mechanical equipment. This BMP is for a project design that either proposes a project within an already disturbed area proposing development that follows the natural contours of the land, and that doesn't require substantial grading or tree removal.

BMP-25 Will this project be designed and built so that it could qualify for LEED?

BMP-25 (a)

LEED™ Silver (check box BMP-25 and this one)

BMP-25 (b)

LEED™ Gold (check box BMP-25, BMP-25 (a), and this box)

BMP-25 (c)

LEED™ Platinum (check all 4 boxes)

Practices with Un-Measured GHG Reduction Potential

BMP-26 Are you, or do you intend to become a Certified Green Business or certified as a "Napa Green Winery"?

As part of the Bay Area Green Business Program, the Napa County Green Business Program is a free, voluntary program that allows businesses to demonstrate the care for the environment by going above and beyond business as usual and implementing environmentally friendly business practices. For more information check out the Napa County Green Business and Winery Program at www.countyofnapa.org.

BMP-27 Are you, or do you intend to become a Certified "Napa Green Land"?

Napa Green Land, fish friendly farming, is a voluntary, comprehensive, "best practices" program for vineyards. Napa Valley vintners and growers develop farm-specific plans tailored to protect and enhance the ecological quality of the region, or create production facility programs that reduce energy and water use, waste and pollution. By selecting this measure either you are certified or you are in the process of certification.

Already Doing Plan To Do

BMP-28 Use of recycled materials

There are a lot of materials in the market that are made from recycled content. By ticking this box, you are committing to use post-consumer products in your construction and your ongoing operations.

BMP-29 Local food production

There are many intrinsic benefits of locally grown food, for instance reducing the transportation emissions, employing full time farm workers, and improving local access to fresh fruits and vegetables.

BMP-30 Education to staff and visitors on sustainable practices

This BMP can be performed in many ways. One way is to simply put up signs reminding employees to do simple things such as keeping the thermostat at a consistent temperature or turning the lights off after you leave a room. If the project proposes alternative energy or sustainable winegrowing, this BMP could include explaining those business practices to staff and visitors.

BMP-31 Use 70-80% cover crop

Cover crops reduce erosion and the amount of tilling which is required, which releases carbon into the environment.

BMP-32 Retain biomass removed via pruning and thinning by chipping the material and reusing it rather than burning on-site

By selecting this BMP, you agree not to burn the material pruned on site.

BMP-33 Are you participating in any of the above BMPS at a 'Parent' or outside location?

BMP-34 Are you doing anything that deserves acknowledgement that isn't listed above?

“Oak Knoll Hotel Project”

5091 Solano Avenue

Napa, California 94558

APN: 035-031-009

Owner/Applicant: Oak Knoll Resort, LLC

Representative: Brian Russell, 1485 Main Street, Suite 205, St. Helena, CA 94574,
707.294.2775, napalandlaw@gmail.com

Zoning: CL (Commercial Limited)

General Plan Designation: Agricultural Resource

Parcel Size: 3.54 Acres

Application Originally Filed: June 19, 2014

Existing Uses/Square Footage of Structures

Building C- Residential- 1,410 sf

Building D- Restaurant- 5,625 sf

Building E- Retail- 16,800 sf

Building F- Residential- 1,500 sf

Building G- Meeting Room/ Garage- 4,220 sf

Building H- Storage- 910 sf

Building I- Office- 1,380 sf

Total Area: 31,845 sf

Proposed Uses/Square Footage of Structures

Hotel Areas

Rooms: 50 rooms at 400sf each = 20,000sf

Check-In/ Reception: 1,100 sf

Fitness Studio: 1,500 sf

Spa: 2,000sf

Hotel Administration: 1,050 sf

Storage/Maintenance (including bicycles): 900sf

Laundry: 1,000 sf

Restaurant, Bar & Kitchen (Including Hotel and Room Service Kitchen Area): 4,700 sf

To Go: 800 sf

Retail: 4,100 sf

Total Area: 36,650 sf

Number of Employees – Proposed

Hotel Employees:	7
Restaurant Employees:	17
Spa Employees:	4
Retail Employees:	2
Maintenance Employees:	3
Total Employees:	33

Parking

Parking- Existing: 111 parking spaces

Parking- Proposed: 109 parking spaces

The Oak Knoll Inn, 2200 Oak Knoll Avenue, 2.1 miles from Project

Project Location

The Project is located north of the city limits of Napa, and south of the town of Yountville, on Solano Avenue which runs parallel to Highway 29. The Property is less than 1/8 of a mile north of the Oak Knoll East intersection.

On the northern border of the Property is Oak Knoll West, which is a private road that runs over the Property. There are vineyards to the west and south of the Property. Solano Avenue runs

along the eastern property line with the under construction and almost complete Vine Trail running along the eastern edge of Solano Avenue.

Laird Winery and vineyard is adjacent to the Property on the western and southern property lines. There are a handful of residences located on Oak Knoll West with two that are adjacent to the Property on the other side of Oak Knoll West.

General Plan Consistency

Policy AG/LU -12: No new non-agricultural use or development of a parcel located in an agricultural area shall be permitted unless it is needed for the agricultural use of a parcel, except as provided in Policies AG/LU-2, AG/LU- 5, AG/LU-26, AG/LU- 44, AG/LU-45, and ROS-1.

The Project meets the standards set forth in Policy AG/LU-45.

Policy AG/LU-15.5: Where proposed residential, commercial, or industrial development abuts lands devoted to agriculture production, the non-agricultural uses shall be required to incorporate buffer area to mitigate potential land use conflicts as conditions of approval for a subdivision or a use permit. The type and width of buffer area shall be determined based on the character, intensity, and sensitivity of the abutting land uses.

The Project has suggested buffer areas in the application.

Policy AG/LU-24: Commercial uses will be grouped in areas outside of those designated for agricultural uses in the General Plan (subject to exceptions contained in Policies AG/LU- 43 through 45 of this General Plan).

The Project meets the standards set forth in Policy AG/LU-45.

Policy AG/LU-45: All existing commercial establishments that are currently located within a commercial zoning district shall be allowed to continue to operate and use the existing buildings and/or facilities. Additional commercial uses and mixed residential-commercial uses which are permitted by the existing commercial zoning of the parcel shall be permitted on that portion of the parcel zoned commercial. With respect to Policies AG/LU-44 and 45, due to the small numbers of such parcels, their limited capacity for commercially-viable agriculture due to pre-existing land uses and/or size, location, and lot configuration, and the minimal impact such commercial operations and expansions will have on adjacent agriculture or open space activities or the agricultural and open space character of the surrounding area, such limited development

will not be detrimental to Agriculture, Watershed, or Open Space policies of the General Plan. Therefore such development is consistent with all of the goals and policies of the General Plan.

The Project is shall not be detrimental to the Agricultural Resource policy and shall be consistent with the commercial limited zoning designation that is been in place since 1955.

Policy E-2: The County recognizes that tourism contributes to the economic viability of agriculture in Napa County and is an important part of the County's economy, generating jobs, local spending, and tax revenues.

The Property has been commercially zoned and used since before 1955. Currently the buildings on the Property are dilapidated and the commercial zoning is underutilized. This Project will meet the regulations stated in the commercial limited zoning district and will contribute to the County's economy by generating new jobs, sparking local spending in the County and for nearby cities, and providing additional tax revenues including sales tax and transient occupancy tax.

Policy E-8: Recognizing the limited availability of non-agricultural land in Napa County, efforts to identify and attract new businesses and employment-generating projects will be targeted toward uses which add value to the county's economy.

The Project aims to considerably contribute to the County's economic viability by creating new job opportunities by establishing a new restaurant and hotel for Napa County.

Uses Allowed Under Commercial Limited Zoning

Chapter 18.28 CL Commercial Limited District

Section 18.28.010 Intent of classification- Eligible property- Characteristics

- A. The intent of the CL district classification is to establish areas which will provide the tourist, vacationer and highway traveler with needed uses and services.

Section 18.28.030 Uses permitted upon grant of a use permit

The following uses may be permitted in all CL districts upon grant of a use permit pursuant to Section 18.124.010:

- B. Hotels, motels, inns, and bed and breakfast establishments (defined in Section 18.08.080 and regulated by Section 18.104.050) with no more than fifty guest rooms;
- C. Restaurant, cafes, coffee shops, delicatessens, bars and taverns with no more than one hundred seats;
- E. Retail stores less than five thousand square feet in gross floor area selling groceries, candy, ice cream, or alcoholic beverages; Laundromat as an accessory use

Parcel History

- 1955 Commercial activities predate the 1955 zoning ordinance
- 1962 Rezoning #37-62 (Approved May 22, 1968) 1.5 acres rezoned from A-1 to C-1. Expansion of existing C-1 zoning.
- 1968 Use Permit #5-69 (Approved August 5, 1968) Replace commercial facility in a proposed PD district that was removed due to state highway right of way acquisition.
- 1969 Rezoning #6-69 (Approved 8.27.68) 3.5 acres rezoned from C-1 to A-1 to PD.
- 1975 Use Permit #U-607475 (Approved 6.16.75) Enlarge barn at Red Hen Restaurant with a 294 square foot addition.
- 1984 Use Permit #U-308485 (Approved 2.15.84) Expand the operation of the Red Hen Restaurant by allowing outside dining on the existing deck, increasing the hours of operation, constructing restroom addition, modification of parking area, and allowing live entertainment.
 - 120 parking places required
 - Outdoor dining no later than 10pm (per modification by CDPC on 7.25.84)
 - Live music limited to within restaurant structure. No live or taped music permitted after 1:00am
 - Security guard service to be provided on Friday and Saturday nights to control outside activities including parking
 - Public Works required “No Parking” signs on both sides of Oak Knoll West and applicant will enforce no parking along the private road by restaurant patrons
 - Fire Department requires 15 foot clearance around hydrant and the designation of a “No Parking” zone to allow access to hydrant at all times
- 1991 Mod #1 of U-308485 (Approved 3.22.91) Construct new restrooms adjacent to rear of the existing restaurant
- 1992 Use Permit #91182-UP (Approved 1.22.92) Establish a 4900 square foot balloon excursion business within three existing buildings.
 - No outdoor sound amplification equipment shall be used
- 1993 Minor Modification #92406-MOD (Approved 7.9.93) Permit relocation of required parking area for Balloons Above the Valley.
- 1996 Use Permit #96692- Mod (Approved 4.15.98) Modification of #91182-UP to expand the excursion facility by:
 - Correcting equipment storage building 1800 to 2288 square feet.
 - Expanding building three to include covered storage/parking, commercial kitchen, and restrooms.
 - 2600 square concrete slab for truck maneuvering
 - Constructing 576 patio cover
 - Establishing of a 10 table outdoor picnic area for balloon ride customers

- Extending an existing six foot wood fence to screen the facility from public view; and
- Removal of an existing 650 square foot storage building
- 1998 Minor Modification #98173-Mod- Allow construction of a free standing canopy structure and fireplace on the outdoor deck of the restaurant

Project Overview

The former Red Hen property at the intersection of Solano Avenue and Oak Knoll West (the “Property”), will be re-positioned as a sophisticated but yet casual and relatively affordable hotel option in the Napa Valley (the “Project”). Located in close proximity to the City of Napa, as well as Yountville, and set within an idyllic vineyard setting, the property will provide what many Napa Valley tourists are now seeking (i.e. an authentic vineyard setting experience with easy access to the many attractions of Napa Valley). Additionally, the Property will highlight and showcase the importance of the Napa Valley Agricultural Preserve both from an educational perspective but also from a viewshed appreciation perspective.

The Project has been envisioned to be forward thinking from a development, positioning and operational standpoint. This will be reflected in the design and experience throughout the property. The property will be designed with an attention to sustainable design detail and the property’s landscaping will be similarly approached with interesting and captivating plant species throughout, planted in an artful, smart and aesthetically pleasing manner. The species of plants used will be repeated throughout the property. Landscaping is often an afterthought to a property – in the case of this project it will be a fully integrated and synergistic part of the experience, viewshed and stay. Furthermore, the Project will install an advanced water recycling plant that will generate the water used for landscaping from the Property’s wastewater. Additionally, the Project will repurpose the Property’s wastewater for toilet flushing. Not only does this dramatically decrease the amount of potable water used overall at the Property, but dispersing the tertiary treated wastewater on the Property itself perpetually recharges the groundwater beneath the Property.

This will begin with the arrival experience. Unlike other resorts in Napa Valley, the project will not build a grand arrival sequence that emphasizes the automobile, but instead will beautifully landscape its frontage with a de-emphasized automobile entry. The front of the property will be the key focal point with a classically designed barn structure surrounded by lush gardens of agave, sea grasses, flax and palms. The project intends to serve as an outpost for those using the Vine Trail and thus bicycles and pedestrians will be welcomed and encouraged at the property.

Daily cycling rides through the Napa Valley countryside will be offered as well as loaner bikes to take the Vine Trail down to Napa and up to Yountville for the day. The Property, in short, will be a bicycle-centric resort and will also implement a program to encourage and incentivize employees to bike to work as much as possible.

The auto arrival will be well marked, but off to the side of the property frontage and will be well landscaped on either side of the entrance. As one pulls into the property, they will feel like they are entering a garden/park like setting before reaching the arrival area that is covered with a pervious and attractive surface.

As one drives through the arrival sequence, the check-in area will be to the right (west), the restaurant and bar will be directly in front (south) and retail area will be to the left (east) and directly in front. Surrounding the arrival area will be lush gardens and the arrival area will include a window through to the vineyards such that after entering the “garden”, the guest is quickly greeted with a Napa Valley vineyard view. This view will be showcased as the guest is checking in through the orientation of the buildings and the check-in/arrival area which will be limited in size, scale and area.

The parking area will be located to the north with valet parking will be available for all hotel and restaurant guests. The parking area will be screened off with an architectural wall and landscaping such that once a guest arrives, cars are not seen and the pedestrian aspect of the project is emphasized.

For restaurant guests arriving, they will be able to valet their car and move directly to the restaurant entrance. The restaurant and bar will feature a large percentage of outdoor seating with idyllic vineyard and mountain views from every table, as well as views of the landscape garden area and outdoor pool area beyond. The intention is for all guests to feel immersed into the natural and agricultural setting of the Napa Valley as much as possible during their visit, to foster and grow an appreciation for the Napa Valley and the surrounding agricultural land preserves. The restaurant and bar will also include a bocce court to bring guests and patrons outdoors.

Given the small check-in/arrival area and absence of the traditional larger “lobby” area, the Hotel will include a second story garden pavilion for hotel guests offering incredible views of the adjacent vineyards and Mayacamas to the west and a relaxing area to sit, read a book or paper or watch the sunset.

For hotel guests, movement to each room will occur on a series of pathways that have been designed to also frame vineyard views to the south and west. As the guests proceed from one location to another, the vineyard setting is emphasized once again with a similar landscape pallet in various garden and planter areas along the way.

The entry to each room will be inviting with lush landscaping at the entrance to each building. All of the rooms have been designed to have full vineyard views and each room has been designed to maximize the impact of the view. Every room will include a gracious indoor experience with 18 to 20 foot wide room bays and significant outdoor garden patios or decks on the second story. The patio and deck areas will provide an outdoor yet private area with fantastic views.

The additional amenities of the hotel will include an outdoor pool area, a full service spa and a workout room. All amenities and common areas have been located as far as possible from neighboring residences to ensure minimal disturbance to the adjacent parcels and neighbors.

The pool area will have full vineyard and mountain views and will be sized to accommodate lap swimming. This area will include relaxing chaise lounge areas, great views and landscaping with the goal to create a zen relaxation area for the guests of the hotel. The location has been designed to optimize sun exposure and pool time throughout the day.

The full service spa will be located adjacent to the pool area, centrally located for all guest units and will include an indoor/outdoor spa experience.

The workout facility will also be located adjacent to the pool area and will include vineyard views from the area.

Intimate garden seating areas will be sprinkled throughout the property to allow guests to relax in these locations and take in the natural and agricultural setting while they read a book or take tea or a glass of wine.

Every aspect of the property will be developed to maximize views within a garden and park like setting, with as much permeable surface area as possible. As mentioned, all areas have been designed to mitigate impacts to neighbors as well. The property has been designed to leave a lasting impression on the guests on the importance and beauty of the surrounding vineyards, hillside and view shed as well as the overarching importance of the Napa Valley agricultural preserve.

Events

The Project is proposing to host twelve (12) events per year with no more than 100 people at each event, and twelve (12) events per year with no more than 75 people attending the event. Event guests will either park on site with the assistance of a valet service, or utilize a shuttle service which will be pre-arranged based on the nature of the event.

The character of the events could vary. We anticipate that the events will consist of: corporate meetings and retreats, educational lectures, small receptions and trade events associated with the local wine industry.

Proposed Building Design:

The proposed architectural style is a contemporary approach to an agrarian style. The materials that will be used are wood, metal, stone and glass. The colors will be muted, and non-reflective. All lights will be fully shielded and downward facing.

Historical Buildings

A historical resources report was completed in August of 2011. The report concluded that, "Due to lack of integrity for the buildings, no mitigation measures are recommended for demolition." The historical resources report for the Property is included for reference.

Traffic

Owner has engaged the traffic engineer, W-Trans, to analyze the Project's potential environmental impacts. Due to the location and number of trips, a left turn lane will be required. The proposed left turn lane is shown in the civil engineering drawings.

The Project will also include a crosswalk allowing guests of the Property to move from the Property across Solano Avenue to the Vine Trail safely. The proposed crosswalk is shown in the civil engineering drawings.

Parking

Section 18.110.030 of the Napa County Code dictates how many parking places are required for a certain project based on the Project program. When using the parking table from Section 18.110.030, it was determined that the required number of parking places is 113.

According to Section 18.110.040 (E) Reduction in Parking Requirements for Non-Automobile Use Programs. The zoning administrator or commission may allow up to a ten percent reduction in parking requirements for commercial or industrial development if such development includes measures such as staggered work hours, provision of employee bus passes, provision of van pools/car pool/shuttle programs or the like and if there is an enforceable means to carry out the program.

Our Non-Automobile Use Programs, which is below, would allow the Project to reduce its number of parking spaces by ten percent to 102. The Project is proposing 109 parking spaces.

Oak Knoll Hotel Non-Automobile Use Program:

The proposed Project will be positioned as an active lifestyle hotel that is also progressive in design and environmental approach including employee transportation alternatives. The proposed Project is seeking a Reduction in Parking Requirements for Non-automobile Use Programs including but not limited to the following pro-active measures that will be taken to reduce automobile commuting to the property:

- As a hotel property, the Oak Knoll Hotel will in general have a staggered work hour program with several shifts of labor throughout the day. As a result, at no point in time will all employees be on the property as there will be morning, afternoon, evening and graveyard shifts with periods of reduced employee levels in between certain shifts.
- Parking has been designed to accommodate peak hours and visitation and employee staffing but such visitation and staffing will often be less.
- Route 10 of the Vine Transit system runs by the property along Solano Avenue and a bus stop currently exists at the intersection of Solano and Orchard Avenues, approximately .6 miles from the property. This stop is served by Southbound and Northbound buses starting as early at 6 am and as late as 10 pm, depending on the weekday versus weekend, and intervals of every 30 or 60 minutes depending on the time of day. Incentive programs will be created to increase the number of employees that commute to work using the

Vine, including the issuance of employee bus passes for those that demonstrate frequent use of the Vine for commuting to work at the property.

- The Project will be bike oriented and serving and will be located on the frontage of the Napa Valley Vine Trail on Solano Avenue. Bicyclist serving retail is envisioned where bikers can stop to purchase equipment or various sundries such as coffee and snacks. As a result, bike racks will be installed at the property and will also be available to employees. An incentive program will be created and maintained for employees that bike to work on a frequent basis.
- An incentive program for those that frequently carpool to work will also be established and maintained.
- A shuttle program, if deemed necessary and depending on logistics and location of employees homes, will be created, implemented and maintained.

Greenhouse Gases/Climate Action Plan

The Project plans to implement the following environmentally conscious measures to ensure that the Project is reducing greenhouse gases and complying with Napa County's Climate Action Plan:

- Storm water detention to treat pollutants in the storm water runoff. This consists of filtering landscape areas in the parking lots and the underground detention/infiltration system.
- Storm water retention of the storm water runoff to reuse for landscape irrigation, stored in an underground system.
- Onsite Bicycle parking.
- Several fruits, vegetables and herbs will be grown on the Property and used in preparing the food that is served at the restaurant.
- Electrical vehicle charging station.
- Permeable pavers in the entry court.
- 8 foot deep covered and private balconies reduce footprint of conditioned space and shade interior space from the sun.
- Buildings will be constructed with sustainably sourced cross-laminated timber.
- Building materials are mainly natural wood and metal.
- Route 10 if the Vine Transit system runs by the property along Solano Avenue and a bus stop currently exists at the intersection of Solano and Orchard Avenues, approximately .6 miles from the property. This stop is served by Southbound and Northbound buses starting as early at 6 am and as late as 10 pm, depending on the weekday versus weekend, and intervals of every 30 or 60 minutes depending on the time of day. Incentive programs will be created to increase the number of employees that commute to work using the

Vine, including the issuance of employee bus passes for those that demonstrate frequent use of the Vine for commuting to work at the property.

- The Project will be bike oriented and serving and will be located on the frontage of the Napa Valley Vine Trail on Solano Avenue. Bicyclist serving retail is envisioned where bikers can stop to purchase equipment or various sundries such as coffee and snacks. As a result, bike racks will be installed at the property and will also be available to employees. An incentive program will be created and maintained for employees that bike to work on a frequent basis.
- An incentive program for those that frequently carpool to work will also be established and maintained.
- A shuttle program, if deemed necessary and depending on logistics and location of employees homes, will be created, implemented and maintained.

PROJECT BACKGROUND AND JUSTIFICATION

As a matter of background and justification:

- The Project Property is currently supplied with municipal water by the City of Napa.
- The Property is 3.5 acres in size.
- An easement of approximately .5 acres across the Property serves as a private road known as Oak Knoll West.
- The Net Usable Acreage of the Property is 3 acres.
- Parking and roadways for the proposed development will require approximately 1.4 acres of land leaving 1.6 acres of usable land.

The proposed Project Design, with 100% onsite effluent treatment and re-use, will serve as a model for water conservation in the Napa Valley and elsewhere applying new technology and design techniques in a highly green and socially responsible manner.

The Project:

- Is consistent with the CL Zoning and will provide services outlined in the CL Zoning.
- Embraces the agricultural surroundings of the Property.
- Will be low density in design
- Includes a footprint and total square footage only slightly greater than what currently exists at the Property.
- Will provide high quality jobs for locals already living in the area.
- Will promote an active lifestyle that is synergistic with the adjacent Vine Trail.

- Will promote modes of transportation that are environmentally responsible and reduce emissions as well as traffic.
- Includes significantly less non-permeable surfaces than current condition– alternatively, the majority of the site (other than building footprints) will consist of permeable surfaces, potentially including “grass-crete” in the parking area.
- Will implement, promote and serve as a model and new standard for water recycling and re-use in the Napa Valley and elsewhere

PALISADES
HOSPITALITY GROUP

November 19, 2015

Mr. John McDowell
Deputy Planning Director, Napa Planning Commission
1195 Third Street, Suite 210
Napa, California 94559

Dear Mr. McDowell and Members of the Napa Planning Commission:

Thank you for your letter dated July 18th and sent to the attention of Brian Russell. In response to the specific points that you raised in your letter regarding the employment levels at any given time; please be assured we based our findings on actual employee numbers from our current hotel, restaurant and spa operations located in Yountville:

	<u>North Block/Redd Wood</u>	<u>Oak Knoll Hotel</u>
Hotel Rooms:	20	50
Restaurant Seats:	90	100
Spa Treatment Rooms:	4	6

	<u>North Block/Redd Wood</u>	<u>Oak Knoll Hotel</u>
Hotel Employees ⁽¹⁾ :	5	7
Restaurant Employees ⁽²⁾ :	15	16
Spa Employees	3	4
Retail Employees:	0	2
Maintenance Employees:	2	3
Total Employees:	25	32

⁽¹⁾ Three front desk/reservations employees and one housekeeping employee per 13 rooms.

⁽²⁾ Includes to-go operations.

As you can see, we based our Oak Knoll Restaurant, Hotel and Spa project estimates on actuals from the above operations. Thus we anticipate the total number of employees on any given day will be a maximum of 32.

I hope that this letter provides useful information for your continued consideration of our proposal and we look forward to sharing the application with you as soon as it can be submitted. If you would like to reach me to discuss any of these matters, my full contact details are found below.

Respectfully,

Tim Harmon

CEO

Palisades Hospitality Group

STORM WATER NOTES

1. THE BASMAA (BAY AREAS STORMWATER MANAGEMENT AGENCIES ASSOCIATION) STORMWATER STANDARDS REQUIRES ALL STORMWATER DERIVED FROM IMPERVIOUS AREAS TO BE FILTERED PRIOR TO BEING RELEASED OFF-SITE. A STORMWATER BIoretention FACILITY SHALL BE INSTALLED NEAR THE SOUTH WEST CORNER OF THE PARCEL, SIZED TO TREAT ALL STORMWATER DERIVED FROM THE PROPOSED AND RECONSTRUCTED IMPERVIOUS AREAS OF THE PARCEL.
2. ALL STORM DRAIN INLETS SHALL CONVEY STORMWATER VIA A SUB-SURFACE STORM DRAIN SYSTEM TO STORMWATER LIFT STATION #1, WHERE THE STORMWATER IS TO BE PUMPED VIA A FORCE MAIN INTO THE BIoretention FACILITY FOR INITIAL FILTRATION AND INFILTRATION.
3. IN THE EVENT THE ON-SITE BIoretention FACILITY RECEIVES MORE STORMWATER THAN CAN BE INFILTRATED, AN OVERFLOW STRUCTURE WILL CONVEY THE STORMWATER INTO STORMWATER LIFT STATION #2.
4. AFTER COLLECTING THE OVERFLOW STORMWATER, LIFT STATION #2 CONVEYS THE STORMWATER TO THE EXISTING CULVERT LOCATED WITHIN SOLANO AVENUE ALONG THE FRONTAGE FOR THIS SUBJECT PROPERTY.
5. BASED ON A CULVERT ANALYSIS PREPARED BY THIS OFFICE AND INCLUDED WITH THIS SUBMITTAL, THE EXISTING CULVERT HAS A CAPACITY OF 9.71 CUBIC FEET PER SECOND (4,357 GALLONS PER MINUTE).
6. LIFT STATION #2 SHALL BE DESIGNED WITH (2) PUMPS WORKING ON A LEAD-LAG BASIS. PUMP #1 SHALL BE DESIGNED TO CONVEY A FLOWRATE LESS THAN THE 2-YEAR PRE-CONSTRUCTION CONDITIONS (2.73 CFS). IF THE INFLOW INTO LIFT STATION #2 IS GREATER THAN 2.73 CFS, THEN THE SECOND PUMP SHALL BE KICKED ON TO ALLEVIATE THE STORMWATER FROM THE SITE.
7. IN NO INSTANCE SHALL THE PEAK STORMWATER FLOWRATE FROM LIFT STATION #2 EXCEED THE CULVERT CAPACITY OF 9.71 CFS.

EARTHWORK NOTES

1. FINISHED ELEVATIONS ARE DESIGNED TO FOLLOW THE NATURAL GRADE OF THE PROPERTY. THE PROJECT GOAL IS TO BALANCE THE EARTHWORK QUANTITIES IN ORDER TO MINIMIZE ANY EXCESS CUT VOLUMES OR REQUIRED FILL VOLUMES. THEREFORE, EARTHWORK CUT AND FILL VOLUMES, IF ANY, WILL BE MINIMAL FOR THIS PROJECT.

UTILITY NOTES

ELECTRICAL NOTES

1. THE EXISTING ELECTRICAL SYSTEM IS SERVED BY SEVERAL JOINT POLES AND OVERHEAD LINES LOCATED ON THE PROJECT PARCEL. THE JOINT POLES ALSO CONTINUE PG&E SERVICE THROUGH THE PROJECT PARCEL TO ADJACENT PARCELS ON THE NORTH AND WEST.
2. THE MAIN INTENTION OF THE PROPOSED ELECTRIC SYSTEM DESIGN IS TO REMOVE THE JOINT POLES AND OVERHEAD LINES ON THE PROJECT PARCEL AND REPLACE WITH UNDER GROUND LINES. TO PROVIDE CONTINUED SERVICE TO THE ADJACENT PARCELS, ELECTRICAL LINES WILL BE ROUTED AROUND THE PROJECT PARCEL. JOINT POLE #1 TO JOINT POLE #2 ALONG THE PROPERTY FRONTAGE ON SOLANO WILL BE UNDER GROUND. NEW JOINT POLES WILL BE INSTALLED ON OAK KNOLL AVENUE WEST TO BRING POWER AND COMMUNICATIONS TO THE ADJACENT PARCELS THAT WERE PREVIOUSLY SERVED BY THE JOINT POLES ON THE PROJECT PARCEL.
3. OWNER TO COORDINATE WITH PG&E REGARDING THE CONVERSION OF OVERHEAD LINES TO UNDER GROUND LINES WITHIN THE PARCEL, RE-ROUTING OF PG&E POWER LINES AROUND THE PROJECT PARCEL FOR CONTINUED SERVICE, AND THE REMOVAL OF ANY PG&E ELECTRICAL UTILITY EASEMENTS WITHIN THE PROJECT PARCEL.

GAS NOTES

1. THE PROJECT PARCEL CURRENTLY FEATURES A COMBINATION OF PROPANE AND NATURAL GAS.
2. OWNER TO COORDINATE WITH PG&E REGARDING GAS SERVICE UPGRADES.

DOMESTIC WATER NOTES

1. DOMESTIC WATER FOR THE HOTEL WILL BE PROVIDED BY TWO EXISTING CONNECTIONS TO THE CITY OF NAPA WATER SYSTEM. THE EXISTING METERS ARE 1" AND 3/4" IN SIZE. BASED ON THE WILL SERVE LETTER PROVIDED BY CITY OF NAPA WATER DEPARTMENT, THE MAXIMUM FLOW RATE FROM BOTH WATER LINES IS 65 GALLONS PER MINUTE.
2. THE PROJECT PROPOSES TO USE A PUMP SYSTEM AND 48,000 GALLON UNDER GROUND FIBERGLASS TANK FOR DOMESTIC WATER STORAGE TO ENSURE PROPER FUNCTION DURING DAILY PEAK FLOW DEMANDS.
3. ALL PUMP AND CONTROL EQUIPMENT REQUIRED TO SUPPLY THE HOTEL SITE WITH WATER ARE TO BE DESIGNED AT THE CONSTRUCTION DOCUMENT PHASE.

FIRE PROTECTION WATER NOTES

1. CITY WATER SHALL NOT BE DIRECTLY USED FOR THE FIRE PROTECTION SYSTEM. BASED ON NAPA COUNTY CODE, AN ESTIMATED MINIMUM 70,000 GALLONS OF WATER MUST BE STORED ON-SITE FOR USE BY HYDRANTS AND BUILDING SPRINKLERS.
2. TO MEET STORAGE REQUIREMENTS, TWO (2) 40,000 GALLON UNDER GROUND FIBERGLASS STORAGE TANKS WILL BE USED. THE STORAGE TANKS WILL BE CONNECTED TO A PUMPING SYSTEM CAPABLE OF SUPPLYING THE REQUIRED FLOW RATES AND PRESSURE TO ALL HYDRANTS AND BUILDING SPRINKLERS.
3. ALL PUMP AND CONTROL EQUIPMENT REQUIRED TO SUPPLY THE HOTEL SITE WITH FIRE PROTECTION WATER ARE TO BE DESIGNED AT THE CONSTRUCTION DOCUMENT PHASE.

DOMESTIC WASTEWATER NOTES

FOR THE ON-SITE DOMESTIC WASTEWATER TREATMENT AND DISPERSAL DESIGN, PLEASE REFER TO PLANS PREPARED BY FALL CREEK ENGINEERING. ADDITIONAL TANKAGE AND EQUIPMENT BEYOND WHAT IS SHOWN ON THIS UTILITY PLAN IS REQUIRED FOR THE WASTEWATER SYSTEM.

CONSUMER PROTECTION NOTICE: THIS DOCUMENT IS A PRELIMINARY DESIGN AND NOT BE USED FOR CONSTRUCTION OR FOR ANY OTHER PURPOSE. THE DESIGNER ASSUMES NO LIABILITY FOR ANY OTHER ENGINEERING OR DESIGN ERRORS OR OMISSIONS THAT MAY BE FOUND IN THESE PLANS. ALL CHANGES TO THESE PLANS MUST BE IN WRITING AND MUST BE APPROVED BY THE DESIGNER. THE DESIGNER'S LIABILITY IS LIMITED TO THE DESIGN AND CONSTRUCTION OF THE PROJECT AS SHOWN ON THESE PLANS. THE DESIGNER DOES NOT ASSUME RESPONSIBILITY FOR THE ACCURACY OF ANY INFORMATION PROVIDED TO THE PROJECT. IT REPRESENTS THE LATEST INFORMATION AVAILABLE TO THE PROJECT.
