NAPA COUNTY BOARD OF SUPERVISORS
Board Agenda Letter

TO: Board of Supervisors
FROM: Steven Lederer - Director of Public Works
Public Works
REPORT BY: Andrew Butler, Senior Engineer - 707-259-8671
SUBJECT: Oakville to Oak Knoll Group B Revegetation, PW 19-21 - Approval of Plans and Specifications and Authorization to Advertise

RECOMMENDATION
Director of Public Works requests the following actions related to the Oakville to Oak Knoll Group B Revegetation, PW 19-21:

1. Approval of plans and specifications; and
2. Authorization to advertise for sealed bids and opening of the bids at a time, date, and location to be published by the Director of Public Works pursuant to Section 20150.8 of the Public Contract Code.

EXECUTIVE SUMMARY
The final design for the Oakville to Oak Knoll (OVOK) Group B Revegetation, PW 19-21 is complete. This project is part of the larger Napa River Restoration effort and will continue restoration activities on the Napa River to reduce sediment loads into the river and to provide biological complexity throughout the river channel. It is funded through grants and matched with County unincorporated area Measure A funds. With funding in place, the project is ready to go out to bid. The project is anticipated to be completed in 2022, after conclusion of a three-year plant establishment period.

FISCAL IMPACT
Is there a Fiscal Impact? Yes
Is it currently budgeted? Yes
Where is it budgeted?

Public Works Projects Fund 1000, Subdivision 1220500, Program 07002. The overall OVOK Project is funded by grants from the Environmental Protection Agency, the Wildlife Conservation Board, the State Water Resources Control Board, the California State Coastal Conservancy, US EPA, and local funding through Measure A. The attached table outlines the estimated project budget. The OVOK Group B Revegetation Budget is a subset of the overall OVOK project budget and is being funded by a Wildlife Conservation Board grant and mitigation funding from Caltrans and Storage Tech, LLC.

Is it Mandatory or Discretionary?

Discretionary

Discretionary Justification:
The project is a continuation of the Napa River Restoration Projects to enhance the riparian environment, protect water quality, and reduce sediment loads into the river.

Is the general fund affected?

Yes

Future fiscal impact:
The project is anticipated to be complete in 2022 after plant establishment. Following construction, long term maintenance is being funded by the OVOK Community Facilities District that was created by the Flood Control District.

Consequences if not approved:
If this item is not approved, grant monies, landowner involvement, and an opportunity to restore and improve habitat and water quality may be lost.

Additional Information:

ENVIRONMENTAL IMPACT

ENVIRONMENTAL DETERMINATION: The project is the subject of a Mitigated Negative Declaration (SCH No. 2014012057), which was adopted by the Napa County Public Works Director on April 11, 2014. According to the Mitigated Negative Declaration, the proposed project would have, if mitigation measures are not included, potentially significant environmental impacts in the following areas: Aesthetics, Biological Resources, Transportation/Traffic, Cultural Resources, and Air Quality. This project site is not on any of the lists of hazardous waste sites enumerated under Government code section 65962.5. Project permit obtained from the United States Army Corps of Engineers will include additional environmental evaluations to comply with NEPA as may be needed if Federal grant funds are used to fund future construction efforts.

BACKGROUND AND DISCUSSION

The Napa River Oakville Crossroad-Oak Knoll Avenue (OVOK) Restoration Project will continue restoration activities to reduce sediment loads into the river and to provide biological complexity throughout the river channel similar to those performed in the recently completed Rutherford Reach Restoration Project. The OVOK project spans approximately 9.5 miles, beginning south of Oakville Crossroad and ending near Oak Knoll Avenue. Specific restoration sites have been identified and organized into construction Groups A, B, C, and D. Due to limitations in restoration funding for these sites, construction of the four groups is not sequential. Group A, C, and B are currently funded and in various stages of construction as outlined below. Group D is currently in design phase and funding for construction is being sought. The attached map shows the locations of the construction sites associated with each group and the attached budget shows the estimated project budget for Group B (the subject of this item).
**Group A**
Construction of Group A was completed in summer 2016 and revegetation began in the spring of 2017.

**Group C**
Construction of Group C was completed in 2018 and is currently in a revegetation phase which will end in 2021.

**Group B (The subject of this Item)**
Group B consists of five sites: 15, 17, 18, 19 and 20. The project involves grading the river channel to create diversity and to reconnect the waterway to its historic floodplain. The planned habitat structures and erosion protection will allow for a healthier ecosystem without creating additional risk to landowners in the area. The revegetation project will install native plants throughout the Group B area after the construction contract is complete. The revegetation contractor will establish and maintain the plantings for three years.
